

addressing the increasing complexity of global trade supply chains. All participation and data submitted is voluntary. Find more details about GBI in the 1651–0141 GBI information collection.

■ The GBI Test is expanding the available supply chain entity party types from the original six optional parties (Manufacturer, Shipper, Seller, Exporter, Distributor, Packager), to include two new parties: “Intermediary” and “Source,” along with optional free text fields that will allow filers to input additional descriptions and information about the specific party type. These party types would be made available in the GBI Enrollment database as well as the Automated Commercial Environment Cargo Release.

■ A modification within the Global Business Identifiers (GBI) Enrollment database will allow the trade to submit one or more of the unique GBI’s (the Legal Entity Identifier (LEI), Global Location Number (GLN), and Data Universal Numbering System (DUNS)) for a supply chain entity, as opposed to all three as previously approved and announced. Furthermore, a related programming update will enable trade participants the ability to modify or change a previous enrollment, including updating or adding additional GBI numbers.

■ CBP intends to expand the choices of identifiers available to filers over the duration of the Test, including those that at no cost to the government provide access to the underlying entity and product specific supply chain data associated with the identifier. This would enhance traceability for CBP which may translate to facilitation benefits and reduced industry costs. CBP has initiated programming requests in ACE to accommodate the intake of additional GBI identifier qualifiers. These changes are under development and there is no defined timeline for their completion. Specifically, CBP will begin by adding to the GBI Test the new Altana ID (ALTA) maintained by Altana Technologies, USG Inc. (Altana). The addition of the ALTA identifier alongside current and future GBI identifiers will widen participants’ choices and allow CBP to continue to evaluate the breadth and veracity of entity and supply chain information embedded within different types of identifier solutions already being leveraged by trade industry traceability stewards. It will also contribute to CBP’s ongoing exploration of how traced supply chain information may be ingested and operationalized for risk management and facilitation purposes.

CBP will add any new identifiers into the collection and submit to OMB for approval as they are determined through a change request (Form 83–C).

2. *Russian Sanctions Executive Order 14114:*

■ New Data Elements are being added to comply with the Russian sanctions outlined in Executive Order 14114 published on December 22, 2023. The data elements and burden are recorded in the supporting statement of the 1651–ONEW Russian Sanctions information collection package.

3. *Update to Form 3461/3461ALT Instructions:* The instructions on the Form 3461/3461 ALT have been updated to include the new Russian sanctions data elements and text field boxes, as well as being updated to improve user experience and clarity of the form. Find a copy of the new form, with the changes outlined included with this package submission as supplementary documents.

Type of Information Collection: ACE Cargo Release/ABI.

Estimated Number of Respondents: 9,810.

BILLING CODE 9111–14–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R2–ES–2025–0053;
FXES11140200000–256–FF02ENEH00]

Notice of Availability; Crossroads-Hobbs-Roadrunner Transmission Project Habitat Conservation Plan and Draft Environmental Assessment; Roosevelt and Lea Counties, New Mexico

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, received an application from Nextera Energy Transmission Southwest, LLC for an incidental take permit (permit) supported by the *Crossroads-Hobbs-Roadrunner Transmission Project: Dunes Sagebrush Lizard Habitat Conservation Plan* (CTHCP) in Roosevelt and Lea counties, New Mexico. The CTHCP includes a proposed plan to build 137 miles of 345-kV transmission line in Roosevelt and Lea Counties. With this notice, we announce the availability for public comment of the proposed CTHCP and the draft environmental assessment (draft EA). If approved, the requested permit would authorize incidental take of the dunes sagebrush lizard. We invite comments from the public and Federal, Tribal, State, and local governments. **DATES:** We must receive your written comments on or before December 31, 2025.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and materials that we receive, will be available for public inspection online in Docket No. FWS–R2–ES–2025–0053 at <https://www.regulations.gov>.

Submitting Comments: If you wish to submit comments on any of the documents, you may do so in writing by one of the following methods:

- *Online:* <https://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS–R2–ES–2025–0053.

- *U.S. Mail:* Public Comments Processing; Attn: Docket No. FWS–R2–ES–2025–0053; U.S. Fish and Wildlife Service; MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Shawn Sartorius, Project Leader, U.S. Fish and Wildlife Service Ecological Services, New Mexico Ecological

Services Field Office; telephone 505–248–6419; email Shawn_Sartorius@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), make available for public comment the application submitted by Nextera Energy Transmission Southwest, LLC (NEET SW; applicant) for an incidental take permit (permit) under section 10(a)(1)(B) of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*). The application is supported by the proposed *Crossroads-Hobbs-Roadrunner Transmission Project: Dunes Sagebrush Lizard Habitat Conservation Plan* (CTHCP) and the associated draft EA. The CTHCP addresses the effects of installing a 137-mile (mi) 345-kilovolt (kV) transmission line and associated access roads in Roosevelt and Lea Counties, New Mexico, on the dunes sagebrush lizard (*Sceloporus arenicolus*; DSL).

If approved, the proposed CTHCP would offset impacts to 277 acres (ac) of DSL habitat through the establishment of conservation easements on up to 6,000 ac of private land. In addition, the CTHCP would also establish Land Use Restriction or Condition (LURCs) on up to 20,000 ac of New Mexico State Land Office lands to improve habitat connectivity for the DSL for 35 years. The conservation easements will be finalized within 18 months of the start of construction in DSL habitat.

Authorized incidental take of the DSL would result from construction, operation, and maintenance of the transmission line and associated access roads along with loss of the shinnery oak sand dune habitat on which the DSL depends.

The associated draft EA has been prepared in accordance with the requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). The draft EA evaluates the impacts of, and alternatives to, issuing the permit for the Crossroads-Hobbs-Roadrunner transmission line project.

Background

Section 9 of the ESA and our implementing regulations at 50 CFR part 17 prohibit the “take” of fish or wildlife species listed as endangered or threatened. Take is defined under the

ESA as to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect listed animal species, or to attempt to engage in such conduct” (16 U.S.C. 1538). However, under section 10(a) of the ESA, we may issue permits to authorize incidental take of listed species. “Incidental take” is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing such take of endangered and threatened species are found at 50 CFR 17.21–22 and 50 CFR 17.31–32, respectively.

Proposed Action

The proposed action is the issuance of an incidental take permit (permit) under section 10(a)(1)(B) of the ESA supported by proposed *Crossroads-Hobbs-Roadrunner Transmission Project: Dunes Sagebrush Lizard Habitat Conservation Plan* (CTHCP). The permit duration would be 60 years, expiring in 2085, at which time NEET SW plans to either renew the permit or decommission the transmission line.

The proposed project includes the construction, operation, and maintenance of a new 137-mi 345-kV transmission line and associated facilities. The proposed line would connect the Crossroads, Hobbs, and Roadrunner substations in Lea and Roosevelt counties, New Mexico. The proposed project includes a 150-foot right-of-way consisting of approximately 2,506 ac, 141 ac of temporary laydown yards, 359 ac of access roads, and 926 transmission poles.

The CTHCP’s covered activities are limited to actions within the permit area that are reasonably certain to take DSL. The covered activities will result in impacts to 277 ac of DSL habitat and include: construction and installation of 94 transmission poles and associated maintenance areas, line splicing areas, tensioning and pulling sites, hazard tree removal, emergency response, approximately 16 mi of access roads, general operations and maintenance activities, vegetation maintenance, decommissioning, and repower/recommissioning.

Impacts and take resulting from the covered activities will be minimized and mitigated to the maximum extent practicable through the implementation of minimization measures, as described in section 6 of the CTHCP, and the placing of up to approximately 6,000 ac of private land in conservation easements (of which approximately 3,678 ac fall within suitable DSL habitat). The location of the conservation easements will be determined based on further

negotiations. In addition, although not considered mitigation for impacts to DSL, NEET SW has a goal of conserving 20,000 ac of New Mexico State Land Office lands under Land Use Restriction or Condition (LURCs). The total acreage and location of LURCs is subject to negotiation.

The conservation goal for both the conservation easement lands and lands covered by LURCs would be to connect existing conservation lands east of Highway 206 to existing conservation lands west of Highway 206 to create a large contiguous landscape protected from further large-scale development and prevent future DSL habitat loss and fragmentation.

Alternatives

We are considering one alternative to the proposed action as part of this process, the no action alternative. Under the no action alternative, the Service would not approve the proposed CTHCP and would not issue the permit. Under this alternative, as stated in section 8.2 of the CTHCP, the transmission line would not be built.

Next Steps

We will evaluate the permit application, draft EA, and comments we receive to determine whether the application meets the requirements of the ESA, NEPA, and their implementing regulations. If we determine that all requirements are met, we will approve the CTHCP and issue the permit under section 10(a)(1)(B) of the ESA to the applicant. Our approval will be in accordance with the terms of the CTHCP and specific terms and conditions of the authorizing permit. We will not make our final decision until after the 30-day comment period ends and we have fully considered all comments received during the public comment period.

Public Availability of Comments

All comments we receive become part of the public record associated with this action. If you submit a comment at <https://www.regulations.gov>, your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your hardcopy document to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Moreover, all

submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under the authority of section 10(c) of the Endangered Species Act and its implementing regulations (50 CFR 17.22 and 17.32) and NEPA (42 U.S.C. 4321 *et seq.*).

Leston Jacks,

Acting Regional Director, Southwest Region, U.S. Fish and Wildlife Service.

Endangered Species; Receipt of Recovery Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application for a permit to conduct activities intended to enhance the propagation and survival of endangered species under the Endangered Species Act (ESA). We invite the public and local, State, Tribal, and Federal agencies to comment on this application. Before issuing the requested permit, we will take into consideration any information

that we receive during the public comment period.

DATES: We must receive your written comments on or before December 31, 2025.

ADDRESSES:

Document availability and comment submission: Submit a request for copies of the application and related documents and submit any comments by one of the following methods. All requests and comments should specify the applicant name and application number (*e.g.*, Dana Ross, ES001705):

- (1) *Email:* permitsR1ES@fws.gov.
- (2) *U.S. Mail:* Tanya Sommer,

Threatened and Endangered Species Program Manager, Ecological Services, U.S. Fish and Wildlife Service, Pacific Regional Office, 911 NE 11th Avenue, Portland, OR 97232-4181.

FOR FURTHER INFORMATION CONTACT:

Karen Colson, Regional Recovery Permit Coordinator, Ecological Services, (503) 231-6283 (telephone); permitsR1ES@fws.gov (email). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite the public to comment on an application for a permit under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permit would allow the applicant to conduct activities intended to promote recovery of a species listed as endangered under the ESA.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of "take" includes such activities as pursuing, harassing, trapping, capturing, or collecting, in addition to hunting, shooting, harming, wounding, or killing.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found in the Code of Federal Regulations (CFR) at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the following permit request are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing the requested permit. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to this application. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
ES19045C-4	Hawaii Division of Forestry and Wildlife; Honolulu, HI.	Orangeblack Hawaiian damselfly (<i>Megalagrion xanthomelas</i>) and three Hawaiian picture-wing flies (<i>Drosophila hemipeza</i> , <i>D. montgomeryi</i> , and <i>D. heteroneura</i>).	Hawai'i	Collect/capture eggs and adults; handle, transport, hold, establish and maintain a breeding colony in captivity; release/translocate, mark, monitor, lethal take for genetic sampling, euthanasia, and salvage.	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue a permit to the applicant listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of
