I. Obtaining Information and Submitting Comments

A. Obtaining Information

To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. B. Submitting Comments

The NRC encourages timely electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2025-0479 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

The NRC uses the “direct final rule procedure” for rulemaking when the NRC anticipates the rule is unlikely to

attract significant adverse comment because the rule is non-controversial. As explained further, this rulemaking would add a “sunsetting clause” to certain regulations many of which are outdated, seldomly used, or duplicative with other regulations. Moreover, the NRC will provide the public with an opportunity to provide additional information on whether the sunsetting provision should be extended for these provisions at a future time as well as provide Tribal consultation opportunities in compliance with NRC’s Tribal Policy Statement (82 FR 2402; January 9, 2017). Therefore, because the NRC does not anticipate significant public comments on this rulemaking and considers this action to be noncontroversial, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. The direct final rule will become effective on January 8, 2026. However, if the NRC receives significant adverse comments by January 2, 2026, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule’s underlying premise or approach, or would be ineffective or unacceptable without a change.¹ A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be

ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC to make a change (other than editorial) to the rule.

For a more detailed discussion of the proposed rule changes and associated analyses, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

Executive Order (E.O.) 14270, “Zero-Based Regulatory Budgeting to Unleash American Energy,” directs the NRC to issue a rule inserting a conditional sunset date into each of its regulations that are in effect as of the date of the E.O. (90 FR 15643; April 9, 2025) and were issued in whole or in part pursuant to the following statutes, as amended: the Atomic Energy Act of 1954, the Energy Reorganization Act of 1974, and the Nuclear Waste Policy Act of 1982. The conditional sunset date for covered regulations is to be one year after the effective date of the sunset rule. The E.O. directs the NRC to issue a sunset rule “to the extent consistent with applicable law” and provides that the E.O. does not apply to “regulatory permitting regimes authorized by statute.” For purposes of implementing this E.O., regulations that provide standards and requirements for NRC license and permit holders or applicants constitute the NRC’s “regulatory permitting regime.” Thus, the scope of this rulemaking is limited to those regulations that do not fit into one or more of the following three categories: (1) regulations that could not be sunset “consistent with applicable law” because they are necessary to fulfill the NRC’s statutory mandate to provide for the common defense and security and to protect public health and safety; (2) regulations that are part of the NRC’s “regulatory permitting regimes authorized by statute”; or (3) regulations that do not implement one of the three NRC-specific statutes identified in the E.O. (*i.e.*, regulations that implement government-wide requirements such as the Freedom of Information Act of 1969). The vast majority of the NRC’s regulations fit into one of these three categories. Nonetheless, the NRC identified several regulations that although they fall into one or more of these categories and are therefore outside the scope of the E.O., they are not being used or no longer serve their original purpose. As explained in section IV, “Discussion,” of the companion direct final rule, the NRC will add a sunsetting provision to those regulations. Importantly, the NRC will

also continue to streamline its regulations through the rulemaking activities directed by E.O. 14300, “Ordering the Reform of the Nuclear Regulation Commission.”

As stated in E.O. 14270, the sunsetting provision will state a conditional sunset date that is one year after the effective date of this rule and provide that the NRC will offer the public an opportunity to comment on the costs and benefits of the regulations to be conditionally sunset before that effective date. The NRC will issue a separate notice describing the comment opportunity after this rule is effective. Following the sunset date, the NRC will consider sunset regulations to no longer be effective, will not seek to enforce sunset regulations, and will remove the regulation from the *Code of Federal Regulations* and make necessary conforming changes. However, following the opportunity for the public to comment on the sunset rule’s costs and benefits, the NRC may extend the conditional sunsetting date if warranted and may do so as many times as appropriate.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885). The NRC requests comment on the proposed rule with respect to clarity and effectiveness of the language used.

V. Paperwork Reduction Act

This proposed rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

VI. Regulatory Planning and Review

Executive Order (E.O.) 12866

The Office of Information and Regulatory Affairs (OIRA) has determined that this proposed rule is a significant regulatory action. Accordingly, NRC submitted this proposed rule to OIRA for review. The NRC is required to conduct an economic analysis in accordance with section 6(a)(3)(B) of E.O. 12866. However, NRC considers the costs incurred by this rule to be solely those related to the rulemaking process for this administrative activity.

¹ Administrative Conference of the United States, Adoption of Recommendations (60 FR 43108–43111; August 18, 1995).

Review Under E.O.s 14154, 14192, 14215, and 14300

The NRC has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” E.O. 14215 “Ensuring Accountability for All Agencies,” and E.O. 14300, “Ordering the Reform of the Nuclear Regulatory Commission.” This proposed rule is considered an E.O. 14192 deregulatory action.

Dated: November 13, 2025.

For the Nuclear Regulatory Commission.

Acting Executive Director for Operations.
