

(26) *Requests for Reconsideration Associated with Eagle Permits (Suspension and Revocation)*—Persons notified of the Service's intention to suspend or revoke their permit may request reconsideration.

(27) *Compensatory Mitigation (50 CFR 22.220)*—Permits authorizing eagle take may require compensatory mitigation. Compensatory mitigation must ensure the preservation of the affected eagle species by mitigating an amount equal to or greater than the authorized or expected take. Compensatory mitigation must either reduce another ongoing form of mortality or increase the eagle population of the affected species. Compensatory mitigation for golden eagles must be performed at a 1.2:1 (mitigation: take) ratio. A permit may require compensatory mitigation when the Service determines, according to the best available information, that the take authorized by the permitted activity is not consistent with maintaining the persistence of the local area population of an eagle species.

(28) *Single Application for Multiple Activities (50 CFR 13.11(d)(2))*—If regulations require more than one type of permit for an activity and permits are issued by the same office, the issuing office may issue one consolidated permit. Applicants may submit a single application in these cases, provided the single application contains all the information required by the separate applications for each permitted activity. In instances where the Service consolidates more than one permitted activity into one permit, the issuing office will charge the highest single fee for the activity permitted. Administration fees are not waived for single applications covering multiple activities.

The public may request copies of any form contained in this information collection by sending a request to the Service Information Collection Clearance Officer (see **ADDRESSES**).
