

scientific understanding of TRT for men, including areas where additional evidence or data generation may be most valuable.

3. What scientific barriers might limit progress in increasing the availability of TRT?

4. What additional scientific tools, technologies, or data sources could support the availability of TRT?

5. Are there specific diseases or conditions that have not, traditionally, been treated with TRT for which testosterone could be safely and effectively used and which are currently not indicated in FDA-approved product labeling? If so, please provide the data or evidence supporting these potential uses.
