Abstract: This is a new information collection activity that covers the paperwork burden for tracking the adoption of bilingual labeling of pesticide products. This ICR was developed as part of a requirement by the Pesticide Registration Improvement Act (PRIA). PRIA was enacted in 2004 and established a new system for registering pesticides including fees and guaranteed decision times, along with funding for farmworker protection activities. PRIA was reauthorized in 2007, 2012, 2019, and most recently on December 29, 2022 (PRIA 5). PRIA 5

amended the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) to require bilingual language translation for parts of the end-use pesticide product labels where translation is available in the EPA Spanish Translation Guide for Pesticide Labeling (or the Spanish Translation Guide). PRIA 5 requires that each registered pesticide product released for shipment include either the bilingual language translation for parts of the labeling contained in EPA's Spanish Translation Guide on the pesticide product container, or a link to such translation via scannable technology or other electronic methods readily accessible on the product label. Currently, bilingual labeling is implemented through a non-notification process (see PR Notice 98-10, entitled "Notifications, Non-Notifications and Minor Formulation Amendments" dated October 22, 1998). The non-notification process means that a product label may be updated with Spanish translations without notifying EPA (or EPA reviewing the label), if that is the only change being made to the label. Non-notification label changes are not systematically tracked by EPA. However, PRIA 5 also requires EPA to "develop and implement, and make publicly available, a plan for tracking the adoption of the bilingual labeling." In response, EPA has developed a plan for tracking the adoption of the bilingual labeling. Public comments were originally requested on the draft plan during a 30-day comment period beginning on January 2, 2025 (90 FR 99 (FRL-12231-01)).

In addition to the ICR, EPA is publishing a final Pesticide Registration Notice (PRN), "*Establishment of a Plan to Track the Adoption of Bilingual Labeling on End Use Pesticide Product Labels*", which provides guidance and clarification to pesticide registrants and the public on how the Agency will track the adoption of bilingual labeling. While the requirements in the FIFRA and EPA regulations are binding on EPA and applicants, the PRN is not binding on EPA personnel, pesticide registrants and applicants, or the public. EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide applicants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide product or registration decision. Registrants and applicants may propose alternatives to the guidance provided in any application to the Agency.

Form number: PFN-8500-31.

Respondents/affected entities: Entities potentially affected by this ICR include pesticide importers, pesticide

manufacturers and government establishments responsible for agricultural pest and weed regulation.

Respondent's obligation to respond: Mandatory. 40 CFR 152.
