

individuals not appearing for an assessment (e.g., benefits terminated), results of assessments (e.g., referred to reemployment services, found in compliance with program requirements), estimated savings resulting from cessation of benefits, and estimated savings as a result of accelerated reemployment.

The population served includes claimants who have been determined to be most likely to exhaust their benefits and veterans receiving Unemployment Compensation for Ex-Servicemembers (UCX). It is proposed that the population of claimants who are most likely to exhaust their benefits be reported on the ETA 9128 and the ETA 9129 and separate reports with the same data elements be provided for UCX claimants. These reports will be the ETA 9128 X and the ETA 9129 X. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 13, 2025 (90 FR 20317).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-259, 50-260, and 50-296; NRC-2024-0030]

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Units 1, 2, and 3; Subsequent License Renewal and Record of Decision

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued Subsequent Renewed Facility Operating License Nos. DPR-33, DPR-52, and DPR-68 to Tennessee Valley Authority (TVA), for Browns Ferry Nuclear Plant (BFN), Units 1, 2, and 3, respectively. In addition, the NRC has prepared a record of decision (ROD) that supports the NRC's decision to issue Subsequent Renewed Facility Operating License Nos. DPR-33, DPR-52, and DPR-68.

DATES: The Subsequent Renewed Facility Operating License Nos. DPR-33,

DPR–52, and DPR–68 were issued on December 11, 2025.

ADDRESSES: Please refer to Docket ID NRC–2024–0030 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

SUPPLEMENTARY INFORMATION:

I. Discussion

Notice is hereby given that the NRC has issued Subsequent Renewed Facility Operating License Nos. DPR–33, DPR–52, and DPR–68 to TVA for BFN. TVA is the operator of the facility. Subsequent Renewed Facility Operating License Nos. DPR–33, DPR–52, and DPR–68 authorize operation of BFN by TVA at reactor core power levels not to exceed 3,952 megawatts thermal for each unit, in accordance with the

provisions of the BFN subsequent renewed licenses and technical specifications. Notice is also given that the ROD that supports the NRC's decision to issue Subsequent Renewed Facility Operating License Nos. DPR–33, DPR–52, and DPR–68 is available, and its location is listed in the “Availability of Documents” section of this document.

As discussed in the ROD and the final supplemental environmental impact statement (SEIS), published as NUREG–1437, Supplement 21, Second Renewal, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding Subsequent License Renewal of Browns Ferry Nuclear Plant, Units 1, 2, and 3, Final Report,” dated August 2025, the final SEIS documents the NRC staff's environmental review, including the determination that the adverse environmental impacts of subsequent license renewal (SLR) for BFN are not so great that preserving the option of SLR for energy planning decision-makers would be unreasonable. The final SEIS conclusion is based on: (1) TVA's environmental impact statement and environmental report, as supplemented by additional information; (2) the NRC staff's consultation with Federal, State, Tribal, and local government agencies; (3) the NRC staff's independent environmental review, which is documented in the final SEIS; (4) the NRC staff's consideration of mitigation measures; and (5) the NRC staff's consideration of comments received from other agencies, organizations, and the public.

BFN is a three-unit boiling water reactor site located in Athens, Alabama. TVA submitted its application for subsequent renewal of the renewed facility operating licenses, “Browns Ferry Nuclear Plant, Units 1, 2, and 3—Application for Subsequent Renewed Operating Licenses,” on January 19, 2024, as supplemented by letters through May 1, 2025 (see “Availability of Documents” section of this document). The NRC staff has determined that TVA's application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and NRC regulations. As required by the Act and NRC regulations in title 10 of the *Code of Federal Regulations* (10 CFR), the NRC has made the appropriate findings, which are set forth in the subsequent renewed licenses.

A public notice of the NRC's acceptance for docketing of the subsequent renewed license application

and an opportunity for a hearing was published in the **Federal Register** on March 21, 2024 (89 FR 20254). Further, a notice of intent to prepare a site-specific environmental impact statement and conduct environmental scoping was published on April 3, 2024 (89 FR 23056). On August 6, 2024, the NRC updated the Commission's 2013 findings on the environmental effects of subsequent renewal of the operating license of a nuclear power plant via rulemaking. This final rule redefines the number and scope of the environmental issues that must be addressed during the review of each application for license renewal (LR) and specifically considers the environmental effects of SLR. As part of this update, the NRC issued Revision 2 to the LR generic environmental impact statement (GEIS) to account for new information and to address the impacts of initial LR as well as one 20-year period of SLR. The final rule became effective for NRC staff on September 5, 2024. Thereafter, on October 22, 2024, the NRC staff noticed its intent to prepare a plant-specific supplement to the LR GEIS for the BFN SLR application (89 FR 84401). In May 2025, the NRC staff issued a draft SEIS for public comment, providing the preliminary results of the staff's environmental evaluation of the BFN subsequent license renewal application (SLRA). A notice of availability of the draft SEIS was published in the **Federal Register** on May 30, 2025 (90 FR 23074). In July 2025, the NRC staff issued its Safety Evaluation (SE) regarding the BFN SLRA. In August 2025, the NRC staff issued a final SEIS, providing its final evaluation of the environmental impacts of BFN SLR; a notice of issuance was published in the **Federal Register** on August 29, 2025 (90 FR 42272).

For further details with respect to this action, see: (1) TVA's SLRA for BFN, dated January 19, 2024, as supplemented by letters dated through May 1, 2025; (2) the NRC's SE, dated July 18, 2025; (3) the NRC's final SEIS (NUREG–1437, Supplement 21, Second Renewal) for BFN SLR dated August 2025; and (4) the NRC's ROD, issued in September 2025.
