#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The

Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The 1,3-Butadiene standard requires employers to monitor employee exposure to 1,3-Butadiene, develop and maintain compliance and exposure goal programs if employee exposures to 1,3-Butadiene are above the standard's permissible exposure limits or action level, label respirator filter elements to indicate the date and time it is first installed on the respirator, establish medical surveillance programs to monitor employee health and to provide employees with information about their exposures, and the health effects of exposure to 1,3-Butadiene.

##### II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and

- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

##### III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the 1,3-Butadiene Standard. The agency is requesting that the burden of 887 hours remains the same.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval

of the information collection requirements.

*Type of Review:* Extension of a currently approved collection.

*Title:* The 1,3 Butadiene Standard (29 CFR 1910.1051).

*OMB Control Number:* 1218–0170.

*Affected Public:* Business or other for-profits.

*Number of Respondents:* 57.

*Number of Responses:* 3,610.

*Frequency of Responses:* On occasion.

*Average Time per Response:* Varies.

*Estimated Total Burden Hours:* 887.

*Estimated Cost (Operation and Maintenance):* \$103,550.
