

from “Commanding Officer, Fort Drum, NY” to “U.S. Army, Commanding Officer, Fort Drum, NY.” This change follows the FAA’s current airspace description format guidance.

Additionally, the FAA proposes to make a minor technical amendment by adding two geographic coordinates to the description of restricted area R-5201. Adding these coordinates to the description of restricted area R-5201 does not change the boundaries of the restricted area, but rather ensures coincident boundary alignment with the adjacent restricted areas R-5202A and R-5202B. The geographic coordinates “lat. 44°09'34" N, long. 75°40'00" W” and “lat. 44°06'00" N, long. 75°28'49" W” are added to the description of restricted area R-5201.

The full description of the above restricted area is set forth below in the proposed amendments to part 73.

#### Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, “FAA National Environmental Policy Act Implementing Procedures” prior to any FAA final regulatory action.

Lyndsay Carlson with the Part 141 Modernization Initiative Team, Office of Safety Standards, General Aviation and Commercial Division, Training and Certification Group (AFS-810), Federal Aviation Administration; telephone (202) 267-1100; email [9-AFS-Modernization-Part141-Comments@faa.gov](mailto:9-AFS-Modernization-Part141-Comments@faa.gov).

**SUPPLEMENTARY INFORMATION:** Title 14 Code of Federal Regulations (14 CFR) part 141 (Pilot Schools) prescribes the requirements for issuing pilot school air agency certificates, provisional pilot school air agency certificates, and associated ratings, and the general operating rules applicable to a holder of a certificate or rating issued under part 141. Through a part 141 pilot school, a student may obtain equivalent levels of aeronautical experience in fewer hours than required by 14 CFR part 61 (Certification: Pilots, Flight Instructors, and Ground Instructors). Part 141 schools are required to have FAA certification and supplementary oversight. Specifically, part 141 includes curricula standards for training and procedures to ensure a training course used by a school is adequate, appropriate, and administered by qualified personnel.

The process of licensing or certification of pilot schools in the United States is approaching 100 years of existence. Although the FAA has revised certain regulatory requirements pertaining to pilot schools during this time, part 141 still has many foundational ties to Civil Air Regulations (CAR) part 50, which was implemented in the 1940s. Regulations for pilot schools are typically promulgated to improve safety, reduce aircraft accidents, and embrace changes such as advances in technology and the need for data collection and analysis. Modernizing part 141 is essential for addressing challenges pertaining to certification, certification management, examining authority, and evolving technology and learning methods. The objective of modernizing part 141 is to increase safety and create a foundation for a more structured and robust training environment to aid in the reduction of general aviation fatal accidents.

Therefore, part 141 must be analyzed to determine how it can evolve with the changing aviation industry. Over the course of the project, the FAA is seeking engagement from the flight training industry through participation in public meetings. Collaboration is encouraged to stimulate the innovation of a modern part 141 that will serve the needs of current and future pilot schools, as well as provide a robust and safe training environment that instills the necessary knowledge, skills, critical thinking, and aeronautical decision making in its pilots to create a safer national airspace system.
