Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee requests a temporary variance of the release requirements under Article 401 that require it, in part, to release from Courtright Dam into Helms Creek a minimum flow of 4 cubic feet per second (cfs) from June 1 through November 30, as measured at gaging station downstream of the dam (KI-17). With the variance, the licensee proposes to reduce flow released into Helms Creek to 2.5 cfs September 1 through November 30, 2026, with compliance assessed by a 24-hour average of measurements taken by KI-17. In addition, though Courtright Reservoir does not have a license-required minimum elevation, the licensee advises they will draw down the reservoir to an elevation of 8,000 feet, with an impoundment of 2,283 acre-feet, from September 1 through December 31, 2026. The licensee states that the requested variance and reservoir drawdown is necessary to complete repair and replacement projects related to maintaining Courtright Dam, its low-level outlet bypass valve, and the KI-17 weir.
