

9. *The estimated number of hours needed annually to comply with the information collection requirement or request: 1,220 hours.*

10. *Abstract:* Current NRC security regulations include security requirements pertaining to nuclear power reactors and Category I Strategic Special Nuclear Material (SSNM) facilities for access to enhanced weapons and firearms background checks. NRC Form 754 collects the information required to perform the necessary firearms background checks. The background check uses the person's fingerprints and other identifying information and is performed under the Federal Bureau of Investigation's National Instant Criminal Background Check System to determine if an individual is prohibited under Federal or State law from possessing or receiving firearms. Licensees submit NRC Form 754 for all security personnel protecting Commission designated facilities, radioactive material, or other property whose duties require them to have access to these weapons.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: December 18, 2025.

For the Nuclear Regulatory Commission.

Heather Dempsey,

Acting NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-613; NRC-2024-0078]

US SFR Owner, LLC; Notice of Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Construction permit application; Notice of uncontested hearing.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or the Commission) will commence an uncontested hearing, in which the Commission will receive written evidence in the form of testimony and exhibits regarding the application submitted by TerraPower, LLC (TerraPower), on behalf of US SFR Owner, LLC (USO), for a construction permit to construct a nuclear-powered generating plant termed Kemmerer Power Station Unit 1 in Lincoln County, Wyoming.

DATES: The Commission may issue written questions to the parties (the NRC staff and the applicant) no later than January 12, 2026. For the full schedule for submitting documents in this hearing, see Sections V and VI of the **SUPPLEMENTARY INFORMATION** section of this document.

ADDRESSES: Please refer to Docket ID NRC-2024-0078 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0078. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. Eastern Time, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Wesley W. Held, Office of the Secretary, U.S. Nuclear Regulatory Commission,

Washington, DC 20555-0001, telephone: 301-287-3591; email: Wesley.Held@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Commission hereby gives notice that, pursuant to Section 189a of the Atomic Energy Act (AEA) of 1954, as amended, it will commence an uncontested hearing, in which the Commission will receive written evidence in the form of testimony and exhibits regarding the application submitted by TerraPower, on behalf of USO, for a construction permit to construct a nuclear-powered generating plant termed Kemmerer Power Station Unit 1 in Lincoln County, Wyoming.

TerraPower's application was submitted by letter on March 28, 2024 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML24088A060).

The NRC staff's Final Environmental Impact Statement and Safety Evaluation Report may be viewed at ADAMS Accession Nos. ML25287A017 and ML25329A252, respectively. This mandatory hearing will concern safety and environmental matters relating to the requested construction permit application, as more fully described below.

II. Evidentiary Uncontested Hearing

The Commission will conduct this hearing using written materials only. The schedule and process for submitting written materials to the Commission is detailed in Sections V and VI below. The parties to this proceeding are TerraPower and the NRC staff.

III. Presiding Officer

The Commission is the presiding officer for this proceeding.

IV. Matters To Be Considered

The matter at issue in this proceeding is whether the review of the TerraPower Kemmerer Power Station Unit 1 construction permit application by the Commission's staff has been adequate to support the findings found in 10 CFR 50.35, 50.40, 50.50, and 10 CFR 51.105. Those findings are as follows:

Issues Pursuant to the Atomic Energy Act of 1954, as Amended

With respect to the construction permit: (1) whether the applicant has described the proposed design of the facility, including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the

public; (2) whether such further technical or design information as may be required to complete the safety analysis, and which can reasonably be left for later consideration, will be supplied in the final safety analysis report; (3) whether safety features or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted, a research and development program reasonably designed to resolve any safety questions associated with such features or components; (4) whether on the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facility, and (ii) taking into consideration the site criteria contained in 10 CFR part 100, the proposed facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public; (5) whether there is reasonable assurance (i) that the construction of the facility will not endanger the health and safety of the public, and (ii) that construction activities can be conducted in compliance with the Commission's regulations; (6) whether the applicant is technically and financially qualified to engage in the proposed activities in accordance with the Commission's regulations in chapter I of title 10 of the CFR; (7) whether the issuance of a permit for the construction of the facility to the applicant will not, in the opinion of the Commission, be inimical to the common defense and security or to the health and safety of the public; and (8) whether the application meets the standards and requirements of the AEA and the Commission's regulations, and that notifications, if any, to other agencies or bodies have been duly made.

Issues Pursuant to the National Environmental Policy Act (NEPA) of 1969

With respect to the construction permit: (1) determine whether the requirements of Sections 102(2)(A), (C), and (E) of NEPA and the applicable regulations in 10 CFR part 51 have been met; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; (3) determine, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and

considering reasonable alternatives, whether the construction permit should be issued, denied, or appropriately conditioned to protect environmental values; and (4) determine whether the NEPA review conducted by the NRC staff has been adequate.

V. Schedule for Submittal of Written Evidence

All documents to be filed by the parties as described below should be filed in accordance with the requirements of our E-filing rules at 10 CFR 2.304(g) and will be considered exhibits in this proceeding once filed.

No later than December 16, 2025, the NRC staff should E-file the following documents to add them to the docket for this hearing: (1) SECY-25-0102, which will serve as the NRC staff's primary written testimony in this hearing, (2) the construction permit application,¹ (3) the draft construction permit, (4) the safety evaluation, (5) the environmental impact statement, (6) the draft record of decision, and (7) any report submitted by the Advisory Committee on Reactor Safeguards in compliance with § 182(b) of the AEA and 10 CFR 50.58(a) regarding the Kemmerer Power Station Unit 1 construction permit and any NRC staff response thereto. If any of these documents are non-public, then the NRC staff should also file a public version, if practicable.

No later than January 12, 2026, the Commission may issue written questions to one or both of the parties (the NRC staff and the applicant). If such questions are issued, party testimony responding to such questions, and associated exhibits (if any), are due January 26, 2026, unless the Commission directs otherwise. The applicant may also file additional written testimony by January 26, 2026.

VI. Interested Government Participants

No later than January 2, 2026, any interested State, local government body, or Federally recognized Indian Tribe may file with the Commission a statement of any issues or questions that the State, local government body, or Indian Tribe wishes the Commission to give particular attention to as part of the uncontested hearing process. Such statement may be accompanied by any supporting documentation that the State, local government body, or Indian Tribe sees fit to provide. Any statements and supporting documentation (if any)

¹ If, due to its size, the application is too large to file through the E-filing system, the NRC staff may file a document that lists the ADAMS accession number for the package of each part of the application.

received by the Commission using the agency's

E-filing system² by the deadline indicated above will be made part of the record of the proceeding. The Commission will use such statements and documents as appropriate to inform its questions to the NRC staff and applicant and its hearing decision.

Many of the procedures and rights applicable to the inherently adversarial nature of NRC's contested hearing process are not available in this uncontested hearing. Participation in the NRC's contested hearing process is governed by 10 CFR 2.309 (for persons or entities, including a State, local government, or Indian Tribe seeking to file contentions of their own) and 10 CFR 2.315(c) (for an interested State, local government, or Federally recognized Indian Tribe seeking to participate with respect to contentions filed by others). Participation in this uncontested hearing does not affect the right of a State, a local government, or an Indian Tribe to participate in a separate contested hearing process.

Dated at Rockville, Maryland, this 18th day of December, 2025.

For the Nuclear Regulatory Commission.

Carrie Safford,

Secretary of the Commission.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2024-0222]

Information Collection: NRC Form 244, Registration Certificate—Use of Depleted Uranium

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, NRC Form 244, "Registration Certificate—Use of Depleted Uranium."

² The process for accessing and using the agency's E-filing system is described in the June 4, 2024, notice of hearing (89 FR 47997) that was issued by the Commission for this proceeding. Participants who are unable to use the electronic information exchange (EIE), or who will have difficulty complying with EIE requirements in the time frame provided for submission of written statements, may provide their statements by electronic mail to hearingdocket@nrc.gov.
