**SUPPLEMENTARY INFORMATION:** This is a proposed extension of the ICR, which is currently approved through December 31, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 5, 2025 during a 60-day comment period (90 FR 18979). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov) or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

**Abstract:** This information collection is requested under the authority of Title II of the Clean Air Act (42 U.S.C. 7521 *et seq.*) Under this Title, EPA is charged with issuing certificates of conformity

for those engines which comply with applicable emission standards. Such a certificate must be issued before engines may be legally introduced into commerce. To apply for a certificate of conformity, manufacturers are required to submit descriptions of their planned production line, including detailed descriptions of the emission control system, and test data.

**Respondents/affected entities:**

Respondents are manufacturers of nonroad engines within the following North American Industry Classification System (NAICS) code: 33618, 33612, 336999, 336991, 333112, 335312.

**Respondent's obligation to respond:**

The respondent's obligation to respond is voluntary, but respondents who chose not to respond cannot obtain a Certificate of Conformity, and therefore cannot introduce their products into commerce in the U.S.

**Estimated number of respondents:**

393 (total).

**Frequency of response:** Yearly for certification, production, ABT, and warranty reports.

**Total estimated burden:** 1,390 hours (per respondent, per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$102,388,928.41 (per year), includes \$45,650,002.40 annualized capital or operation & maintenance costs.

**Changes in the estimates:** There is a decrease of 328 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due largely to fewer respondents than the previous ICR and more manufacturers utilizing carrying over data from previous model years to demonstrate compliance with the standards.

**Abstract:** TSCA section 5 requires manufactures (which includes import) of a "new chemical substance" (*i.e.*, a chemical not listed on the TSCA section 8(b) Inventory) must provide a premanufacture notice (PMN) to EPA at least 90 days prior to commencing manufacture of that chemical and that

EPA review such notice and take appropriate action. Under TSCA, the term "chemical substance" includes microorganisms; the 90-day notice for microorganisms is a Microbial Commercial Activity Notice (MCAN).

Under TSCA section 5, EPA is authorized to determine that a use of a chemical substance is a significant new use and promulgate a significant new use rule (SNUR). In certain instances, persons may pursue a significant new use, thus they must submit a notice and undergo a review. TSCA section 5 requires a significant new use notice (SNUN) from any person who proposes to manufacture or process a chemical for a use EPA determined to be a "significant new use."

TSCA section 5 requires EPA to make one of five possible determinations before concluding its review of submitted notices about risk to human health & the environment from the manufacture, processing, distribution in commerce, use and/or disposal of new chemical substances or significant new uses. EPA's determination on a new chemical substance or new use will dictate how and to what extent the chemical's manufacture, processing, distribution, use, and/or disposal may be restricted. If EPA fails to make a timely determination, fees may be refunded; however, EPA's obligation to make a determination remains. EPA requires the submitter of a PMN or MCAN inform EPA when non-exempt commercial manufacture of the substance in question begins by submitting a Notice of Commencement; EPA would then add the new chemical substance to the TSCA section 8(b) Inventory.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b), and regulations that interpret TSCA section 12(b) at 40 CFR part 707; and the associated paperwork activities and burdens approved under OMB Control No. 2070-0030 (EPA ICR No. 0795.16), "Notification of Chemical Exports—TSCA Section 12(b)".

Existing chemicals are chemicals already listed on the TSCA Inventory; and therefore "existing chemical SNURs" are often written to require notice for significant new uses of chemicals already in commerce.
