

Dated: December 22, 2025.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is helically-wound, overhead door counterbalance torsion steel springs (overhead door counterbalance torsion springs) and any cones, plugs or other similar fittings for mounting and creating torque in the spring (herein collectively referred to as cones) attached to or entered with and invoiced with the subject overhead door counterbalance torsion springs. Overhead door counterbalance torsion springs are helical steel springs with tightly wound coils that store and release mechanical energy by winding and unwinding along the spring's axis by an angle, using torque to create a lifting force in the counterbalance assembly typically used to raise and lower overhead doors, including garage doors, industrial rolling doors, warehouse doors, trailer doors, and other overhead doors, gates, grates, or similar devices. The merchandise covered by this investigation covers all overhead door counterbalance torsion springs with a coil inside diameter of 15.8 millimeters (mm) or more but not exceeding 304.8 mm (measured across the diameter from inner edge to inner edge); a wire diameter of 2.5 mm to 20.4 mm; a length of 127 mm or more; and regardless of the following characteristics:

- wire type (including, but not limited to, oil-tempered wire, hard-drawn wire, music wire, galvanized or other coated wire);
- wire cross-sectional shape (e.g., round, square, or other shapes);
- coating (e.g., uncoated, oil- or water-based coatings, lubricant coatings, zinc, aluminum, zinc-aluminum, paint or plastic coating, etc.);
- winding orientation (left-hand or right-hand wind direction);
- end type (including, but not limited to, looped, double looped, clipped, long length, mini warehouse, Barcol, Crawford, Kinnear, Wagner, rolling steel or barrel ends); and
- whether the overhead door counterbalance torsion springs are fitted with hardware, including but not limited to fasteners, clips, and cones (winding or stationary cones).

For purposes of the diameters referenced above, where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above.

The steel torsion springs included in the scope of this investigation are produced from steel in which: (1) iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less, by weight.

Subject merchandise includes cones attached to or entered with and invoiced with the subject overhead door counterbalance torsion springs. Such cones,

which are typically cast aluminum, aluminum alloy or steel (but may be made from other materials) are made to mount the subject springs to the overhead door counterbalance system and create and maintain torque in the spring. Cones or other similar fittings that are not attached to the subject springs or are not entered with and invoiced with the subject springs are not included within the scope unless entered as parts of kits as described below.

Subject merchandise also includes all subject overhead door counterbalance torsion springs and cones or other similar fittings for mounting and tensioning the spring entered as a part of overhead door kits, overhead door mounting or assembly kits, or as a part of a spring-operated motor assembly or as a part of a spring winder assembly kit for torsion springs. When counterbalance torsion springs and cones or other similar fittings for attaching and tensioning the torsion spring are entered as a part of such kits, only the counterbalance spring and cones or other similar fittings in the kit are within scope.

Subject merchandise also includes overhead door counterbalance torsion springs that have been further processed in a third country, including but not limited to cutting to length, attachment of hardware, cones or end-fittings, inclusion in garage door kits or garage door mounting or assembly kits, or any other processing that would not remove the merchandise from the scope of this investigation if performed in the country of manufacture of the in-scope overhead door counterbalance torsion springs.

All products that meet the written physical description are within the scope of this investigation unless specifically excluded. The following products are specifically excluded from the scope of this investigation:

- leaf springs (slender arc-shaped length of spring steel of a rectangular cross-section);
- disc springs (conical springs consisting of a convex disc with the outer edge working against the center of the disc);
- extension springs (close-wound round helical wire springs that store and release energy by resisting the external pulling forces applied to the spring's ends in the direction of its length);
- compression springs (helical coiled springs with open wound active coils (such open winding is also known as pitch) that are designed to compress under load or force); and
- spiral springs (torsion springs wound as concentric spirals such as a clock spring or mainspring).

The products subject to this investigation are currently classified under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7320.20.5020, 7320.20.5045, and 7320.20.5060. They may also be classified under HTSUS subheading 8412.90.9085 if entered as parts of spring-operated motors. They may also be classified in HTSUS subheading 8412.80.1000 (spring-operated motors) if entered as part of a spring counterweight assembly for an overhead door. They may also be classified in HTSUS subheading 7308.90.9590, a basket category that includes metal garage doors entered with mounting accessories or assemblies. Although the HTSUS subheadings are

provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Appendix II

List of Topics Discussed in the Issues and Decision Memorandum

- I. Summary
- II. Background
- III. Final Affirmative Determination of Critical Circumstances
- IV. Discussion of the Issues
 - Comment 1: Whether to Apply Adverse Facts Available (AFA) to Alcomex
 - Comment 2: Whether to Revise the Total AFA Rate for the Non-Responsive Companies
 - Comment 3: Whether to Assign the Highest Petition Margin as the All-Others Rate
- V. Recommendation

L-Lysine From the People's Republic of China: Postponement of Preliminary Determination in the Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable December 29, 2025.

FOR FURTHER INFORMATION CONTACT: Mira Warriar and Jerry Xiao, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482–8031 and (202) 482–2273, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 24, 2025, the U.S. Department of Commerce (Commerce) initiated a less-than-fair-value (LTFV) investigation of imports of L-Lysine (Lysine) from the People's Republic of China.¹ Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.² Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty

¹ See *L-Lysine from the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation*, 90 FR 26782 (June 24, 2025).

² See Memorandum, "Deadlines Affected by the Shutdown of the Federal Government," dated November 14, 2025.

Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines by an additional 21 days.³ Accordingly, the deadline for this preliminary determination is now January 12, 2026.

Postponement of Preliminary Determinations

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in a LTFV investigation within 140 days after the date on which Commerce initiated the investigation. However, section 733(c)(1)(A)(b)(1) of the Act permits Commerce to postpone the preliminary determination until no later than 190 days after the date on which Commerce initiated the investigation if: (A) the petitioner makes a timely request for a postponement; or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR 351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. Commerce will grant the request unless it finds compelling reasons to deny the request.

On October 10, 2025, the petitioner⁴ submitted a timely request that Commerce postpone the preliminary determination in this LTFV investigation.⁵ The petitioner stated that it requested postponement, “because one mandatory respondent in this investigation (the collapsed entity including Eppen Asia Pte Ltd and Ningxia Eppen Biotech Co., Ltd.) only recently submitted its initial responses to the Department’s antidumping questionnaire, and the subsequently chosen mandatory respondent (Zhengzhou Longgu Trading Co., Ltd.) has yet to file its initial questionnaire responses.”⁶

For the reasons stated above and because there are no compelling reasons to deny the request, Commerce, in accordance with section 733(c)(1)(A) of the Act, is postponing the deadline for the preliminary determinations by 50 days (*i.e.*, 190 days after the date on

which this investigation was initiated). As a result, Commerce will issue its preliminary determination no later than March 3, 2026. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination, unless postponed at a later date.

Notification to Interested Parties

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: December 19, 2025.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–533–937]

Overhead Door Counterbalance Torsion Springs From India: Final Affirmative Countervailing Duty Determination and Final Affirmative Critical Circumstances Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of overhead door counterbalance torsion springs (overhead door springs) from India. The period of investigation is January 1, 2023, through December 31, 2023.

DATES: Applicable December 31, 2025.

FOR FURTHER INFORMATION CONTACT: Zachary Shaykin, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2638.

SUPPLEMENTARY INFORMATION:

Background

On April 3, 2025, Commerce published its *Preliminary Determination in the Federal Register*.¹ In the

¹ See *Overhead Door Counterbalance Torsion Springs from India: Preliminary Affirmative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination*, 90 FR 14602 (April 3, 2025) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

Preliminary Determination, and in accordance with section 705(a)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(b)(4), Commerce aligned the final determination of this countervailing duty (CVD) investigation with the final determination in the companion antidumping duty investigation of overhead door springs from India.² Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.³ Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.⁴ Accordingly, the deadline for this final determination is now December 22, 2025.

For a complete description of the events that followed the *Preliminary Determination*, see the Issues and Decision Memorandum.⁵ The Issues and Decision Memorandum is a public document and is on file electronically via ACCESS. ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Scope of the Investigation

The products covered by this investigation are overhead door springs from India. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

We received no comments from interested parties on the scope of the investigation as it appeared in the *Preliminary Determination*. Therefore, we made no changes to the scope of the investigation from that published in the *Preliminary Determination* for the final determination.
