Farm Service Agency

[Docket ID: FSA-2025-0268]

Information Collection Request; Organic Certification Cost Share Program

AGENCY: Farm Service Agency, USDA.

ACTION: Notice; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on a revision of a currently approved information collection request associated with the Organic Certification Cost Share Program (OCCSP).

DATES: We will consider comments that we receive by March 2, 2026.

ADDRESSES: We invite you to submit comments on this notice. You may submit comments by this method: *Federal eRulemaking Portal:* Go to: www.regulations.gov and search for Docket ID FSA-2025-0268. Follow the online instructions for submitting comments.

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Copies of the information collection may be requested by contacting Jenae Orso.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activity, contact Jenae Orso; (229) 850-0194; email: jenae.prescott@usda.gov. Individuals who require alternative means of communication for program information should contact the USDA

Target Center at (202) 720-2600 (voice) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any telephone).

SUPPLEMENTARY INFORMATION:

Background

OCCSP provides cost share assistance to producers and handlers of agricultural products for the costs of obtaining or maintaining organic certification under the National Organic Program (NOP). Section 10606 of H.R. 1 (Pub. L. 119-21, also referred to as the “One Big Beautiful Bill Act”) authorized \$10,000,000 in National OCCSP funding for fiscal years 2025 through 2031 (7 U.S.C. 6523(d)). An additional \$1,000,000 in Agricultural Management Assistance funding is available for each fiscal year (7 U.S.C. 1524(b)). This notice announces that FSA is requesting comments from all interested individuals and organizations on a revision of a currently approved information collection request associated with OCCSP. FSA will announce the OCCSP application periods for certified organic operations and State Agencies in a future final rule.

Description of Information Collection Request

Title: Organic Certification Cost Share Program.

OMB Control Number: 0560-0289.

Type of Request: Revision of a currently approved information collection.

OMB Expiration Date: March 31, 2026.

Abstract: FSA is requesting comments from all interested individuals and organizations on a revision of a currently approved information collection request associated with OCCSP. OCCSP provides cost share assistance to producers and handlers of agricultural products for the costs of obtaining or maintaining organic certification under the National Organic Program (NOP).

To receive cost share assistance, producers and handlers submit an application form and itemized invoices showing expenses paid to a third-party certifying agency for certification services during the fiscal year for which the application is submitted. Producers and handlers who apply through State Agencies must also submit a W-9, Request for Taxpayer Identification Number and Certification. Producers and handlers who apply through FSA county office must submit AD-2047, Customer Data Worksheet, and SF-3881, ACH Vendor/Miscellaneous

Payment Enrollment Form, if not already on file with FSA.

FSA also accepts applications from State Agencies to establish grant agreements to administer OCCSP for producers and handlers in their States. Participating State Agencies will submit SF-424, Application for Federal Assistance; a signed Notice of Grant and Agreement Award; SF-425, Federal Financial Report; an annual narrative report, and an annual spreadsheet of organic operations that were reimbursed for eligible expenses. State Agencies will also submit at least one SF-270, Request for Advance of Reimbursement; for the purpose of calculating the burden for this collection, FSA has used an estimate of 2 responses for SF-270, which is the average number submitted by respondents annually in recent years.

FSA is requesting a revision of the approved information collection. The revisions are due to adjustments to the estimated number of respondents based on program participation in recent years, changes to the estimated hours per response for some responses to accurately reflect the time necessary to complete them, updates to reflect the forms currently used for FSA programs to administer grant agreements and collect respondent information, and changes to accurately account for exempt burden hours. For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response hours multiplied by the estimated total annual responses.

Estimate of Respondent Burden:

Public reporting burden for this collection of information is estimated to average 0.6482 hours per response.

Respondents: Individuals, Businesses, Farms, and State Governments.

Estimated Annual Number of Respondents: 12,030.

Estimated Number of Responses per Respondent: 3.7232.

Estimated Total Annual Responses: 44,790.

Estimated Average Time per Response: 0.6482 hours.

Estimated Total Annual Burden on Respondents: 29,031 hours.

We are requesting comments on all aspects of this information collection to help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information including the

validity of the methodology and assumptions used;

(3) Evaluate the quality, utility, and clarity of the information technology; and

(4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses where provided, will be made a matter of public record. Comments will be summarized and included in the request for OMB approval of the information collection.

Kimberly Graham,

Associate Administrator, Farm Service Agency.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–54–2025]

Foreign-Trade Zone (FTZ) 84, Notification of Proposed Production Activity; Q-Edge Corporation; (Hardware/Modules Relating to Consumer Electronics and Servers); Houston, Texas

Q-Edge Corporation (Q-Edge) submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Houston, Texas within FTZ 84. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on December 19, 2025.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/ component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via www.trade.gov/ftz.

The proposed finished products include: plastic air guide hood; laptop; tablet; desktop computer; server; main logic board; motherboard with data processing function; keyboard; notebook sub-assembly; stylus pen; solid-state drive-storage unit for data; projection module; aluminum alloy keycap; antenna for microcomputer; expansion

circuit board for audio and video with USB interface; back cover for tablets made of aluminum alloy; plastic conduits to hold wires; cover assembly of aluminum alloy; steel or plastic; cushioning pad made of plastic; fixed steel clamp; fixed steel frame for computer; plastic front cover for computers and servers; laptop computer upper casing made of aluminum alloy; laptop; memory expansion interface circuit board; computer case frame made of aluminum alloy; network interface expansion circuit board and interface card; network interface card; protective plastic cover computers, server and pencil; tablet computer keyboard with motherboard and protective cover; tablet computer keyboard; server motherboard with central processing unit; stylus pen for use with tablet; cell phone; smart TV streaming module with wireless network adapter; smartwatch; Bluetooth audio device; antenna module for smartphone; smartwatch main logic board; smart phone main logic board; semi-finished assembly for smartwatch; smartwatch back cover assembly; speaker module; sub-assembly receiver; mainboard for earphones; touchscreen with liquid crystal display for tablet; organic light-emitting diode display module for smartwatch; display assembly for smart phone; camera lens; camera module; driver circuit board for display; rear camera module; power switch panel without signal transmission lines; light emitting diode; touch panel for tablets and servers; ringer device; and, laser radar scanning module (duty rate ranges from duty-free to 4.50%).

The proposed foreign-status materials/components include: double-sided adhesive tape; hot melt adhesive film; solder paste; humidity indicator sheet made of cellulose-based paper with reactive dye; composite electromagnetic shielding sheet used to prevent interference; thermal conductive sheet made of silicone and alumina; heat gel; plastic pellets of polyethylene; plastic granules acrylonitrile butadiene styrene; polyethylene with primary shape of formaldehyde; plastic granules of polycarbonate; plastic granules of polycarbonate and acrylonitrile butadiene styrene with polycarbonate content greater than 50%; plastic granules of high-performance polyamides; plastic granules of high-performance polyamides; plastic granules of polyamides; heat resistant labels; self-adhesive protective film made of polyethylene foam for support and protection of goods; protective film

of ethylene; polypropylene protective film; acrylic plastic sheet; polycarbonate protective film; protective polyethylene terephthalate plastic film; polyurethane protective film; plastic synthetic leather foam; plastic foam for protection and support of servers; silicone rubber cushion pad; plastic protective cover for tablets; sulfurized rubber shim; vulcanized rubber sealing gasket; vulcanized rubber spacer; protective paper dustproof separator; polyester fiber conductive and antistatic mesh fabric for microphone; glass panel for laptop; fiberglass and resin support board for tablet keyboard; fiberglass spacer; cold-rolled stainless-steel strip; steel acoustic module temporary screw; steel stud and rod with diameter greater than 6mm; steel nut; steel spacer; steel washer; steel button holder; steel spring; steel spiral spring; steel test block; titanium copper alloy foil; tinfoil; phosphor bronze foil; copper gasket; copper slotted nuts copper; copper nut; brass nut; copper spring; aluminum alloy extrusion; aluminum alloy rectangular thick plate; aluminum foil with padding and paper backing; aluminum rivets; aluminum studs; aluminum alloy test block; aluminum spacer; standard black of tantalum; subscriber identity module card ejector; chain link made of steel; stainless steel, glass and plastic decorative name plate; plastic heat dissipation fan; plastic air guide hood; laptop computer; motherboard with central processing unit; main logic board for tablet, computers, and servers; keyboard for tablet; touchpad for laptop; notebook computer bottom casing components of aluminum alloy; magnet and steel absorption strip; antenna with cover; steel axle protection cover; backlight module; backlight panel; built-in microphone with acoustic protection cover; steel dust net; plastic clips; plastic buttons; aluminum alloy computer cover; copper and polyester fiber conductive film; stainless steel connection bar; plastic and steel fixed mounting bracket; plastic and steel fixed board; plastic steel fixed bar, brackets and clips; plastic and steel fixed brackets; plastic and steel fixed clips; metal (stainless steel/copper/alloy) or conductive composite electromagnetic shielding; glass protective panel; heat sink; interface extension circuit board; keyboard panel; fiberglass and resin keyboard mounting block; keypad function control circuit board; light emitting diode indicator circuit board; light sensing circuit board; motherboard (without CPU); heatsink without fan for passive cooling; protective screen with casing; strip non-wired coated float
