

twenty (20) AIM-120D-3 guidance sections, including precise positioning provided by either Selective Availability Anti-Spoofing Module or M-Code; and four (4) AIM-120C-8 guidance sections. The following non-MDE items will be included: AMRAAM propulsion sections, warheads, AIM-120 Captive Air Training Missiles (CATM), missile containers, and control section spares; Common Munitions Built-in Test (BIT) Reprogramming Equipment (CMBRE); ADU-891 Adaptor Group Test Sets; munitions support and support equipment; spare and repair parts, consumables, accessories, and repair and return support; classified software delivery and support; classified publications and technical documentation; transportation support; studies and surveys; warranties; US Government and contractor engineering, technical, and logistical support services; and other related elements of logistics and program support. The estimated total cost is \$3.64 billion.

This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a major ally that is a force for political stability and economic progress in the Indo-Pacific region.

The proposed sale will improve Japan's capability to meet current and future threats by defending its homeland and U.S. personnel stationed there. Japan will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Japan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25-08

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-120D-3 series Advanced Medium Range Air-to-Air Missile (AMRAAM) is a supersonic, air-launched, aerial intercept guided missile featuring digital technology and microminiature solid-state electronics. AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets. The AIM-120D-3 features a quadrangle target detection device and an electronics unit within the guidance section that performs all radar signal processing, mid-course and terminal guidance, flight control, target detection, and warhead detonation. Precise positioning will be provided by either Selective Availability Anti-Spoofing Module or M-Code.

2. The AIM-120C-8 AMRAAM is a supersonic, air launched, aerial intercept guided missile featuring digital technology and microminiature solid-state electronics. AMRAAM capabilities to include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets.

3. The Common Munitions Built-In Test (BIT) Reprogramming Equipment (CMBRE) is used to interface with weapon systems to initiate and report BIT results and upload and download flight software. CMBRE supports multiple munitions platforms with a range of applications that perform preflight checks, periodic maintenance checks, loading of Operational Flight Program data, loading of munitions mission planning data, loading of Global Positioning System cryptographic keys, and declassification of munitions memory.

4. The ADU-891 Adapter Group Test Set provides the physical and electrical interface between the CMBRE and the missile.

5. The highest level of classification of defense articles, components, and

services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Japan can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Japan.

January 7, 2025

The Honorable Mike Johnson  
Speaker of the House  
U.S. House of Representatives  
H-209, The Capitol  
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 25-0B. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 19-08 of January 29, 2019.

Sincerely,

  
Michael F. Miller  
Director

Enclosure:  
1. Transmittal

Transmittal No. 25-0B

**REPORT OF ENHANCEMENT OR  
UPGRADE OF SENSITIVITY OF  
TECHNOLOGY OR CAPABILITY (SEC.  
36(B)(5)(C), AECA)**

(i) *Purchaser:* Government of Japan  
(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 19-08  
*Date:* January 29, 2019  
*Military Department:* Navy  
(iii) *Description:* On January 29, 2019, Congress was notified by congressional certification transmittal number 19-08 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of two (2) AEGIS Weapon Systems (AWS); two (2) Multi-Mission Signal Processors (MMSP); and two (2) Command and Control Processor (C2P) Refreshes. Also included were radio navigation equipment; naval ordnance; two (2) Identification Friend or Foe (IFF) Systems; Global Command and Control System-Maritime (GCCS-M) hardware; and two (2) Inertial Navigation Systems (INS); United States (U.S.) Government and contractor representatives' technical, engineering and logistics support services;

installation support material; training; construction services for six (6) vertical launch system launcher module enclosures; communications equipment and associated spares; classified and unclassified publications and software; and other related elements of logistical and program support. The total estimated program cost was \$2.150 billion. Major Defense Equipment (MDE) constituted \$.375 billion of this total.

On September 12, 2019, Congress was notified by congressional certification transmittal number 0Q-19 of an increase in capability from the Navigation Sensor System Interface (non-MDE) originally notified to the Global Positioning System (GPS)-based Positioning, Navigation, and Timing Service (GPNTS) capability, which is MDE. The total value of the GPNTS was \$3,417,596, but the total estimated MDE cost and the total case program value remained the same at \$.375 billion and \$2.150 billion, respectively.

On December 14, 2023, Congress was notified by congressional certification transmittal number 23-0V of the following MDE items: two (2) AEGIS Weapon Systems; two (2) AN/SPQ-9B

Radar Systems; two (2) AN/SLQ-32(V)6 Electronic Warfare Systems; two (2) AN/USQ-140 Multifunctional Information Distribution System (MIDS) on Ship (MOS), Modernization (MOS MOD); two (2) AN/USQ-190 Multifunctional Information Distribution System Joint Tactical Radio Systems (V5); three (3) Cooperative Engagement Capability (CEC), AN/USG-10s; and one (1) AN/UYQ-120(V) Command and Control Processor (C2P) Technology Refresh System. Also included were AN/SQQ-89 Underwater Sound Equipment Systems; Multi-Function Towed Array Systems; RT-1829 Ultra-High Frequency, Satellite Communications (UHF SATCOM) Terminals; OE-570D Antennas; MK20 Mod 1 Electro-optic/Infrared Sensor Systems; MK160 Mod 23 Gun Weapon Systems; MK-36 Mod 6 Super Rapid Offboard Countermeasures and Decoy Launching System (SRBOC); U.S. Government and contractor representatives technical, engineering, and logistics support services; installation support material; training, tool development, communications equipment, and associated spares; classified and unclassified publications and software;

and other related elements of logistics and program support. The estimated total value of the new items was \$0.570 billion. The net MDE value increased by \$0.239 billion and the non-MDE value by \$0.331 billion. The revised estimated total case value increased to \$2.72 billion. MDE constituted \$0.614 billion of this total.

This transmittal notifies the addition of the following non-MDE items: medium range ballistic missile live fire test targets; short range ballistic missile live fire test targets; additional AEGIS Weapon Systems components, spares, tech documents, and software required for use at Japan's computer test site; additional U.S. Government and contractor representative technical, engineering, test and evaluation, and logistics support services; installation support material; training, tool development, communications equipment, and associated spares; classified and unclassified publications and software; and other related elements of logistics and program support. The estimated total value of the new items is \$0.67 billion. The non-MDE value will increase by \$0.67 billion to \$2.776 billion. The estimated total case value will increase by \$0.67 billion to a revised \$3.39 billion. MDE will remain at \$0.614 billion of this total.

(iv) *Significance*: The inclusion of this additional equipment and services represents an increase in total dollar value over what was previously notified. The proposed sale will support and assist Japan in developing and maintaining a strong and effective self-defense capability and enhance its capabilities against increasingly sophisticated ballistic missile threats.

(v) *Justification*: This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a major ally that is a force for political stability and economic progress in the Indo-Pacific region.

(vi) *Sensitivity of Technology*:

The Sensitivity of Technology Statement contained in the original notification applies to other items reported here.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) *Date Report Delivered to Congress*: January 7, 2025
