POLICY JUSTIFICATION

Ireland—FGM-148 Javelin Missiles and Lightweight Command Launch Units

The Government of Ireland has requested to buy thirty-six (36) Lightweight Command Launch Units (LwCLUs) that will be added to a previously implemented case whose value was under the congressional notification threshold. The original Foreign Military Sales (FMS) case, valued at \$8.7 million (\$7.9 million in MDE), included forty-four (44) FGM-148 Javelin missiles. This notification is for a combined total of forty-four (44) FGM-148 Javelin missiles and thirty-six (36) Lightweight Command Launch Units (LwCLUs). The following non-MDE items will also be included: missile containers; U.S. Government technical assistance; Enhanced Producibility Basic Skills Trainers (EPBST); training; and other related elements of logistics and program support. The estimated total cost is \$46 million.

This proposed sale will support the foreign policy and national security of the U.S. by improving the security and capabilities of Ireland to support its participation in peacekeeping missions with the United Nations and NATO's Partnership for Peace program.

The proposed sale will enhance Ireland's capability to build its long-term defense capacity to defend its sovereignty and territorial integrity to meet its national defense requirements. Ireland will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be the Javelin Joint Venture between Lockheed Martin, located in Orlando, FL, and RTX Corporation, located in Tucson, AZ. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Ireland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25-27

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Javelin Weapon System is a medium-range, man-portable, shoulder-launched, fire-and-forget anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft, and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors and possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology that allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor to decrease the likelihood of detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, a reusable Light Weight Command Launch Unit (LwCLU) and a missile contained in a disposable launch tube assembly. The LwCLU incorporates an integrated day/night sight that provides target engagement capability in adverse weather and countermeasure environments and may also be used in a stand-alone mode for battlefield surveillance and target detection. The LwCLU's thermal sight is a 3rd generation forward looking infrared sensor. The LwCLU also serves to upload missile software updates.

4. The Javelin missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Ireland can provide the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Ireland.

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 24-125, concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Government of Japan for defense articles and services estimated to cost \$39 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

Michael F. Miller
Director

BILLING CODE 6001-FR-C

Transmittal No. 24-125

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Japan

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$31 million
Other	\$ 8 million
TOTAL	\$39 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

Sixteen (16) AGM-158B/B-2 Joint Air-to-Surface Standoff Missiles with Extended Range (JASSM-ER)

Non-Major Defense Equipment:

The following non-MDE items will also be included: AGM-158 JASSM Dummy Air Training Missiles (DATM) and containers; JASSM Anti-jam Global Positioning System Receivers (JAGR); munitions

support and support equipment; spare parts, consumables, accessories, and repair and return support; integration and test support and equipment; classified and unclassified software delivery and support; classified and unclassified publications and technical documentation; personnel training and equipment; airlift and transportation support; United States (U.S.) Government and contractor engineering, technical, and logistics support services; studies and surveys; and other related elements of logistics and program support.

(iv) *Military Department:* Air Force (JA-D-YBL)

(v) *Prior Related Cases, if any:* JA-D-YBH

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or*

Defense Services Proposed to be Sold: See Attached Annex

(viii) *Date Report Delivered to Congress:* January 15, 2025

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Japan—Joint Air-to-Surface Standoff Missiles with Extended Range

The Government of Japan has requested to buy sixteen (16) AGM-158B/B-2 Joint Air-to-Surface Standoff Missiles with Extended Range (JASSM-ER). The following non-MDE items will also be included: AGM-158 JASSM Dummy Air Training Missiles (DATM) and containers; JASSM Anti-jam Global Positioning System Receivers (JAGR); munitions support and support equipment; spare parts, consumables and accessories, and repair and return support; integration and test support and equipment; classified and unclassified software delivery and support; classified and unclassified

publications and technical documentation; personnel training and equipment; airlift and transportation support; U.S. Government and contractor engineering, technical, and logistics support services; studies and surveys; and other related elements of logistics and program support. The estimated total cost is \$39 million.

This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a major ally that is a force for political stability and economic progress in the Indo-Pacific region.

The proposed sale will improve Japan's capability to meet current and future threats by providing stand-off capability via advanced, long-range strike systems for employment on Japan Air Self-Defense Force (JASDF) fighter aircraft, including but not limited to the F-15J and F-35A/B. Japan will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, located in Orlando, FL. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Japan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24-125

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AGM-158B/B-2 Joint Air-to-Surface Standoff Missile with Extended Range (JASSM-ER) All Up Round (AUR) is a low-observable, highly survivable, subsonic cruise missile designed to penetrate next-generation air defense systems enroute to target. The JASSM-ER is designed to kill hard, medium-hardened, soft, and area-type targets. The extended range over the baseline was obtained by going from a turbo jet to a turbo-fan engine and by reconfiguring the fuel tanks for added capacity.

a. The AGM-158B-2 system capabilities include all the capabilities of the AGM-158B. The AGM-158B-2 configuration will have different internal components to address multiple obsolescence issues as well as subcomponent updates to position for M-Code and other potential upgrades. Global Positioning System/Precise Positioning Service (GPS/PPS) to be provided by either Selective Availability Anti-Spoofing Module (SAASM) or M-Code.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Japan can provide substantially the

same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Japan.
