

emergencies. These respondents include adults, 18 years and older; adolescents, 15 to less than 18 years; and parents or guardians on behalf of their children less than 15 years of age.

In 2019, a PCCPHE GenIC, titled “Risk Factors for Harmful Algal Blooms (HABs),” was conducted to identify sources of and risk factors for HAB exposures. New information gained about HAB exposures were used to improve HAB incident response,

communication, and outreach at the state and national level.

No PCCPHE GenICs were conducted during the past three-year approval period. However, two NPDS-related follow-up studies were implemented during the 2020–2023 approval period using the Secretary’s Public Health Emergency PRA Waiver for COVID–19. During a non-pandemic situation, these two studies would have used this Generic ICR. These studies assessed

unintentional exposures associated with cleaning products (e.g., bleach, hand sanitizers) in home settings to determine knowledge, attitudes, and practices regarding cleaning behaviors and help guide public health messaging.

CDC requests OMB approval for an estimated 250 annual burden hours. No revisions affecting public burden are proposed and there is no cost to the respondents other than their time.

SUPPLEMENTARY INFORMATION:

Background

Section 673(2) of the Omnibus Budget Reconciliation Act (OBRA) of 1981 (42 U.S.C. 9902(2)) requires the Secretary of the Department of Health and Human Services to update the poverty guidelines at least annually, adjusting them on the basis of the Consumer Price Index for All Urban Consumers (CPI–U). The poverty guidelines are used by Medicaid and a number of other Federal programs as a criterion for some or all eligibility determinations. The *poverty guidelines* issued here are a simplified version of the *poverty thresholds* that the Census Bureau uses to prepare its estimates of the number of individuals and families in poverty.

As required by law, this update is accomplished by increasing the latest published Census Bureau poverty thresholds by the applicable percentage change in the Consumer Price Index for All Urban Consumers (CPI–U). The guidelines in this 2026 notice reflect the 2.63 percent price increase between calendar years 2024 and 2025. After updating for inflation, the guidelines are rounded and standardized to establish the same interval between each family size. In rare circumstances, rounding and standardizing in the formula result in small decreases in the poverty guidelines for some household sizes even when the inflation factor is not negative. In cases where the year-to-year change in inflation is not negative and rounding and standardizing in the formula result in reductions to the guidelines from the previous year for some household sizes, the guidelines for

the affected household sizes are fixed at the prior year's guidelines. As in prior years, these 2026 guidelines are roughly equal to the poverty thresholds for calendar year 2025, which the Census Bureau expects to publish in final form in September 2026.

The poverty guidelines continue to be derived from the Census Bureau's current official poverty thresholds; they are not derived from the Census Bureau's Supplemental Poverty Measure (SPM).

The following guideline figures represent annual income.

Separate poverty guideline figures for Alaska and Hawaii reflect Office of Economic Opportunity administrative practice beginning in the 1966–1970 period. (Note that the Census Bureau poverty thresholds—the version of the poverty measure used for statistical purposes—have never had separate figures for Alaska and Hawaii.) The poverty guidelines are not defined for Puerto Rico or other outlying jurisdictions. In cases in which a Federal program using the poverty guidelines serves any of those jurisdictions, the Federal office that administers the program is generally responsible for deciding whether to use the contiguous-states-and-DC guidelines for those jurisdictions or to follow some other procedure.

Due to confusing legislative language dating back to 1972, the poverty guidelines sometimes have been mistakenly referred to as the “OMB” (Office of Management and Budget) poverty guidelines or poverty line. In fact, OMB has never issued the guidelines; the guidelines are issued each year by the Department of Health and Human Services. The poverty guidelines may be formally referenced as “the poverty guidelines updated periodically in the **Federal Register** by the U.S. Department of Health and Human Services under the authority of 42 U.S.C. 9902(2).”

Some federal programs use a percentage multiple of the guidelines (for example, 125 percent or 185 percent of the guidelines), as noted in relevant authorizing legislation or program regulations. Non-Federal organizations that use the poverty guidelines under their own authority in non-Federally-funded activities also may choose to use a percentage multiple of the guidelines.

The poverty guidelines do not make a distinction between farm and non-farm families, or between aged and non-aged units. (Only the Census Bureau poverty thresholds have separate figures for aged and non-aged one-person and two-person units.)

This notice does not provide definitions of such terms as “income” or “family” as there is considerable variation of these terms among programs that use the poverty guidelines. The legislation or regulations governing each program define these terms and determine how the program applies the poverty guidelines. In cases where legislation or regulations do not establish these definitions, the entity that administers or funds the program is responsible to define such terms as

“income” and “family.” Therefore, questions such as net or gross income, counted or excluded income, or household size should be directed to the entity that administers or funds the program.

Date: January 13, 2026.

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.
