Needs and Uses: On December 12, 2018, the Commission adopted rules in FCC 18-177, *Second Report and Order*, published at 84 FR 11226, March 26, 2019. Specifically, the Commission concluded that the obligation to provide permanent disconnect information will apply to all reporting carriers as defined in the Commission's numbering rules, which include wireless, wireline, and interconnected Voice over Internet Protocol providers that obtain numbers from the North American Numbering Plan Administrator. As part of the Commission reporting requirements, reporting carriers must provide, among other things, the most recent date each North American Numbering Plan telephone number allocated or ported to the reporting carrier was permanently disconnected. The telephone number and date of permanent disconnection will allow voluntary users of the database to determine whether a number has been permanently disconnected prior to calling that number, thereby protecting against unwanted calls to consumers and potential Telephone Consumer Protection Act liability for callers. Reporting carriers and voluntary users of the reassigned numbers database may also need to provide contact information, including names, address, and telephone number, to enable the database administrator to contact the reporting carrier in case there are any issues with their submission.
