

The Commission has referred to the North American Numbering Council the development of a technical requirements document for the reassigned numbers database for review by the Commission. The technical requirements document will contain a single, unified set of functional and interface requirements for: technical interoperability and operational standards; the user interface specifications and data format for service providers to report to the Administrator; the user interfaces and other means by which callers may submit queries, including providing callers the abilities for high-volume and batch processing or to submit individual queries; appropriate safeguards to protect the privacy and security of subscribers, protect the database from unauthorized access, and ensure the security and integrity of the data; and keeping records of service providers' reporting and accounting.
