POLICY JUSTIFICATION

United Arab Emirates—F-16 Sustainment

The Government of the United Arab Emirates (UAE) has requested to buy additional F-16 aircraft components, spares, and accessories; and other related elements of logistics and program support that will be added to a previously implemented case whose value was below the congressional notification threshold. The original Foreign Military Sales (FMS) case, valued at \$40.9 million (\$0 in MDE), included Common Munitions Built-in-Test Reprogramming Equipment (CMBRE); munitions support equipment; night vision device (NVD) support and spare equipment; spare parts, consumables and accessories; repair and return support; classified and unclassified software delivery and support; classified and unclassified publications and technical documentation; site surveys; studies and surveys; transportation support; U.S. Government and contractor engineering, technical, and logistics

support services. The estimated total cost is \$130 million.

This proposed sale will support the foreign policy and national security of the U.S. by helping to improve the security of a major defense partner. The UAE is a force for political stability and economic progress in the Middle East.

The proposed sale will improve the United Arab Emirates' ability to defend its sovereignty and territorial integrity to meet its national defense requirements. The United Arab Emirates will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There are no principal contractors associated with this potential sale. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of additional U.S. Government or U.S. contractor representatives to the UAE.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
