### *B. Next Steps for the Fluoride Human Health Toxicity Assessment*

The EPA is accepting public comments on this Assessment Plan for 30 days. The EPA will consider all public comments during the next step in the toxicity assessment process, which is the development of the Systematic Review Protocol (protocol). The protocol will present detailed methods for conducting subsequent steps of the systematic review. The EPA will then follow the protocol to develop a draft Fluoride Human Health Toxicity Assessment. The draft toxicity assessment will follow EPA human health risk assessment methods and guidance, summarize the health effects associated with exposure to fluoride during childhood, and identify the fluoride level at or below which a person can be exposed to and be unlikely to experience harmful health effects. The draft toxicity assessment will be released for external peer review and public comment. The EPA will consider the external peer review and public comments and revise the assessment as appropriate, before publishing a final Fluoride Human Health Toxicity Assessment.
