

Transmitter Assemblies for the AN/AAQ-24(V)N; four (4) system processor replacements for AN/AAQ-24(V)N with Selective Availability Anti-spoofing Modules (SAASMs); and eight (8) LN-251 with Embedded Global Positioning Systems/Inertial Navigations Systems with SAASMs. The following non-MDE items will be included: Tactical Open Mission Software; electro-optical and infrared MX-20HD systems; NexGEN Missile Warning Sensors for the AN/AAQ-24(V)N; AN/AAQ-2(V) acoustic systems; AN/APY-10 radar systems; ALQ-213 early warning management systems; A/N UPX-43 interrogators; KIV-78A cryptographic appliques; A/N APX-123A Identification Friend or Foe transmitters; AN/ARC-210 ultra-high frequency/very high frequency radios; AN/ALE-47 Countermeasures Dispenser System (CMDS) programmers; KY-100M communications security (COMSEC) devices; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The total estimated cost is \$1.8 billion.

This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will enhance Denmark's capability to meet current and future threats by providing a credible force that is capable of deterring adversaries and participating in NATO operations. The proposed sale will support its goal of improving national and territorial defense as well as interoperability with U.S. and NATO forces. Denmark will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the military balance in the region.

The principal contractor will be The Boeing Company, located in Arlington, VA. At this time, the U.S. Government is unaware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations.

Implementation of this proposed sale will require 11 to 14 U.S. Government and contractor representatives to travel to Denmark for a duration of up to two years to support: aircraft fielding and

maintenance, mission systems, training, and logistics and engineering technical assistance.

There will be no adverse impact on defense readiness as a result of this proposed sale.

Transmittal No. 25-102

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

*Sensitivity of Technology:*

1. The P-8A aircraft is a militarized version of the Boeing 737-800 Next Generation (NG) commercial aircraft. The P-8A is a long-range antisubmarine and anti-surface warfare intelligence, surveillance, and reconnaissance (ISR) aircraft capable of broad-area, maritime, and littoral operations.

2. The Multifunctional Information Distribution System—Joint Tactical Radio System (MIDS-JTRS) is an advanced Link-16 command, control, communications, and intelligence (C3I) system. The MIDS-JTRS provides high-capacity, jam-resistant, digital communication links for exchange of near real-time tactical information, including both data and voice, among air, ground, and sea elements.

3. The Guardian Laser Transmitter Assembly (GLTA) is part of the AN/AAQ-24(V)N Direct Infrared Countermeasures (DIRCM) system. The GLTA accepts threat handoff from the mission workstation subsystem, tracks threats using an infrared (IR) camera, and provides high intensity laser jamming to defend against IR missile threats.

4. The Large Aircraft Infrared Countermeasures System (LAIRCM) System Processor Replacement (LSPR) analyzes the data from each Missile Warning Sensor and automatically deploys the appropriate countermeasure via the GLTA. The LSPR contains built-in-test circuitry.

5. The Embedded Global Positioning System (GPS) Inertial Navigation System (INS) (EGI) LN-251 is a sensor that combines GPS and inertial sensor inputs. The EGI/INS provides accurate location information for navigation and targeting.

6. The highest level of classification of defense articles, components, and

services included in this potential sale is SECRET.

7. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

8. A determination has been made that the Government of Denmark can provide substantially the same degree of protection for the technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives as outlined in the Policy Justification.

9. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Denmark.

The Honorable Mike Johnson  
Speaker of the House  
U.S. House of Representatives  
H-209, The Capitol  
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 25-0M. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 24-60 of September 24, 2024.

Sincerely,

  
Michael D. Miller  
Director

BILLING CODE 6001-FR-C

Transmittal No. 25-0M

REPORT OF ENHANCEMENT OR  
UPGRADE OF SENSITIVITY OF  
TECHNOLOGY OR CAPABILITY (SEC.  
36(B)(5)(C), AECA)

(i) *Prospective Purchaser:* Government of Iraq

(ii) *Sec. 36(b)(1), AECA Transmittal No:* 24-60

Date: September 24, 2024

Military Department: Navy

Funding Source: Foreign Military Financing

(iii) *Description:* On September 24, 2024, Congress was notified by congressional certification transmittal number 24-60 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of the follow-on technical support (FOTS) for Iraq's vessel maintenance and repair (VMR) program, which may include ship repair; maintenance; sustainment; support services; repair; upgrades; overhaul services; associated labor and support; United States (U.S.) Government and contractor engineering, technical, and logistics support services

of off-shore vessels, patrol boats and defenders of U.S. origin; fuel for quarterly trilateral exercises; and other related elements of logistics and program support. The estimated total cost was \$65 million. There was no Major Defense Equipment (MDE) associated with this sale.

This transmittal notifies the addition of the following non-MDE items: continued follow-on technical support (FOTS) for Iraq's vessel maintenance and repair program, including off-shore vessels, patrol boats, and defenders; all shore ship repair, maintenance, sustainment, support services, repairs, upgrades, overhaul services, associated labor, and support for vessels of U.S. origin in the Iraq Navy fleet; and other related elements of logistics and program support. The estimated total cost of the new non-MDE items is \$135 million. The estimated non-MDE and total case values will increase by \$135 million to a revised \$200 million. There is no MDE associated with this potential sale.

(iv) *Significance:* The proposed sale will improve Iraq's ability to meet

current and future threats by enhancing the strength of its homeland defense.

(v) *Justification:* This proposed sale will support the foreign policy and national security of the U.S. by helping to improve the security of a strategic partner.

(vi) *Date Report Delivered to Congress:* October 3, 2025

\* as defined in Section 47(6) of the Arms Export Control Act.
