*Public Comments Invited:* You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA’s functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.

[Docket No. FRA–2026–0034]

**Proposed Agency Information Collection Activities; Comment Request**

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the Information Collection Request (ICR) summarized below. Before submitting this ICR to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in the ICR.

**DATES:** Interested persons are invited to submit comments on or before March 31, 2026.

**ADDRESSES:** Written comments and recommendations for the proposed ICR should be submitted on <https://>

[www.regulations.gov](http://www.regulations.gov) to Docket No. FRA–2026–0034. All comments received will be posted without change to the docket, including any personal information provided. Please refer to the assigned OMB control number (2130–0516) in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice, made available to the public, and include them in its information collection submission to OMB for approval.

**FOR FURTHER INFORMATION CONTACT:** Ms. Joanne Swafford, Information Collection Clearance Officer, at email: [joanne.swafford@dot.gov](mailto:joanne.swafford@dot.gov) or telephone: (757) 897–9908.

**SUPPLEMENTARY INFORMATION:** The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60 days’ notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA’s estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, comments received will

advance three objectives: (1) reduce reporting burdens; (2) organize information collection requirements in a “user-friendly” format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

*Title:* Remotely Controlled Switch Operations.

*OMB Control Number:* 2130–0516.

*Abstract:* 49 CFR 218.30 and 218.77 require that remotely controlled switches be properly lined to protect workers as they inspect or service rolling equipment or occupied camp cars on track. These sections require the operators of the remotely controlled switches to remove the locking device controlling the switches only once they have been informed by the person in charge of the workers that it is safe to do so. In addition, these operators are required to maintain a record of each protection request for 15 days. Operators of remotely controlled switches use the information in this record to document protection of workers or camp cars. This record also serves as a valuable resource for railroad supervisors as well as FRA and State inspectors monitoring regulatory compliance.

In this 60-day notice, FRA made an adjustment under § 218.77, which covers the protection of occupied camp cars. The number of notifications annually has been reduced to reflect the infrequent usage of these types of cars. All other information remains unchanged since the last submission.

*Type of Request:* Extension without change (with changes in estimates) of a currently approved collection.

*Affected Public:* Businesses.

*Form(s):* N/A.

*Respondent Universe:* 53 railroads.

*Frequency of Submission:* On occasion.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

*Title:* Bad Order and Home Shop Card and Stenciling Mark.

*OMB Control Number:* 2130–0519.

*Abstract:* Under 49 CFR part 215, railroads are required to inspect freight cars placed in service and take remedial action when defects are identified. A railroad freight car with a part 215 defect may be moved to another location for repair only after the railroad has complied with the process under 49 CFR 215.9. Section 215.9 requires railroads to affix a “bad order” tag (or card) describing each defect to each side of the freight car. It is imperative that a defective freight car be tagged “bad order” (or “home shop for repairs”) so it can be readily identified and moved to another location for repair purposes only, and so that the maximum speed and other restrictions necessary for safely conducting the movement are known. At the repair location, the “bad order” tag serves as a notification of the defective condition of the freight car. Railroads must retain each tag for 90 days to verify that proper repairs were made at the designated location. When inspecting freight cars, FRA and State inspectors review all pertinent records to determine railroads’ compliance with the movement restrictions of § 215.9.

In addition, § 215.301 requires railroads and private car owners to stencil or otherwise display identification marks on freight cars, including a car number and build date. FRA uses the identification marks to help obtain certain information related to a car’s compliance with Federal
