BILLING CODE 6714–01–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Benjamin W. McDonough, Deputy Secretary of the Board, 20th Street and Constitution Avenue NW, Washington DC 20551–0001, not later than February 17, 2026.

A. Federal Reserve Bank of Atlanta (Erien O. Terry, Assistant Vice President) 1000 Peachtree Street NE, Atlanta, Georgia 30309. Comments can also be sent electronically to Applications.Comments@atl.frb.org:

1. *Dinesh V. Raju, Nita K. Parikh, Kiran J. Parikh, Mukund C. Raja, Dhaval S. Shah, Monal K. Shah; 455 Trust, Meena J. Shah and Deep J. Shah,*

individually and as co-trustees; 475 Trust, Jayendrakumar J. Shah and Shveta Shah Raju, individually and as co-trustees; 4580 Trust, Shveta Shah Raju and Asha Shah Prasad, individually and as co-trustees; 3490 Trust, Asha Shah Prasad and Deep J. Shah, individually and as co-trustees; 2764 Trust, Deep J. Shah and Shveta Shah Raju, individually and as co-trustees; all of Duluth, Georgia; Purna Nitin Parikh Rev Living Trust, Purna N. Parikh, individually and as trustee, both of Johns Creek, Georgia; and Samir N. Sheth and Rupa S. Sheth, both of Lilburn, Georgia; as the Shah Family Control Group, a group acting in concert, to retain voting shares of Touchmark Bancshares, Inc., and thereby indirectly retain voting shares of Touchmark National Bank, both of Alpharetta, Georgia. In addition, Deep J. Shah to acquire additional voting shares of Touchmark Bancshares, Inc.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Associate Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC–2026–0133, NIOSH–356]

National Institute for Occupational Safety and Health (NIOSH) Center for Firefighter Safety, Health and Well-Being Portfolio; Request for Information

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Request for information.

SUMMARY: The Centers for Disease Control and Prevention's (CDC) National Institute for Occupational Safety and Health (NIOSH), in the Department of Health and Human Services, requests public input on priority topics related to firefighter safety and health. Through its Center for Firefighter Safety, Health, and Well-Being, NIOSH conducts research and provides services to identify and help prevent new and emerging hazards in the fire service earlier and faster. As the threat from structural, wildland urban interface, and wildland fires grows, NIOSH seeks input to help refine its existing research and engagement priorities. This request is for information-gathering purposes and

does not propose new regulations, requirements, or policies.

DATES: Comments must be received on or before April 3, 2026.

ADDRESSES: Submit comments by either of the following methods:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* NIOSH Docket Office, Robert A. Taft Laboratories, MS C–34, 1090 Tusculum Avenue, Cincinnati, Ohio 45226–1998.

Instructions: All written submissions received in response to this document must include the agency name and docket number (CDC–2026–0133 NIOSH–356) for this activity. All relevant comments, including any personal information provided, will be posted without change to <https://www.regulations.gov>. Do not submit comments by email.

FOR FURTHER INFORMATION CONTACT:

Lauralynn McKernan, 1090 Tusculum Ave., MS R–14, Cincinnati, OH 45226; Telephone (513) 533–8542 (this is not a toll-free number); Email NIOSHregs@cdc.gov.

SUPPLEMENTARY INFORMATION: NIOSH has decades of experience conducting investigations and research on firefighter safety and health. The NIOSH Center for Firefighter Safety, Health, and Well-Being provides a central point for engaging with the broad spectrum of research and service NIOSH conducts around firefighters. The goal of the Center is to protect firefighters by identifying new and emerging hazards in the fire service so that those hazards can be prevented earlier and faster. Firefighters are vital to the safety of our communities. While on duty, firefighters may experience acute events such as injuries, heart attacks, and fatalities. Over time, firefighters are at risk of cancer and other chronic diseases.

Protecting firefighters' safety and health is a top priority for NIOSH. NIOSH works closely with other federal agencies, researchers, and fire-service leaders and organizations to improve firefighter safety and health. As the threat from structural, wildland urban interface (WUI), and wildland fires grows, both firefighters and other workers face risks from fire-related exposures, such as smoke inhalation, post-fire clean-up activities, and hazardous materials. NIOSH is currently engaged in the following firefighter safety and health activities:

- *Services:* NIOSH offers a range of vital services to enhance firefighter safety and health, including:

a. National Firefighter Registry (NFR) for Cancer: Actively enrolling firefighters to understand and reduce cancer risk.

b. NIOSH Respirator Approval Program (RAP): Evaluating the safety of respirators and PPE used by firefighters.

c. Health Hazard Evaluation (HHE) Program: Assessing work-related health hazards to improve worker safety and health.

d. World Trade Center Health Program (WTC Health Program): Providing healthcare to 9/11 responders and supporting internal and extramural grant research into WTC-related health conditions and treatment.

e. Fire Fighter Fatality Investigation and Prevention Program (FFFIPP): Investigating line-of-duty deaths and serious injuries to improve safety and prevent future incidents.

f. Emergency Response Support: Enhancing preparedness and response for both natural disasters and manmade crises, supporting communities with resources and tools.

- *Cancer Prevention*: NIOSH has a variety of activities and research to understand and reduce the risk of cancer in the fire industry, including the NFR, the largest effort ever undertaken to understand and reduce the risk of cancer among U.S. firefighters.

- *Research*: NIOSH conducts research to enhance the health and safety of structural and wildland firefighters. By assessing exposures related to materials burned, fire conditions, and substances encountered such as PFAS in firefighting foam, as well as ways to prevent injury and illnesses, NIOSH continues to be at the forefront of firefighter safety and health research.

- *Personal Protective Equipment (PPE)*: NIOSH evaluates the safety of PPE for structural and wildland firefighters—including respirators and turnout gear—through comprehensive research, evaluations, and the NIOSH Respirator Approval Program, safeguarding the health and safety of all responders.

- *Partnerships*: NIOSH collaborates with federal agencies, researchers, fire-service leaders, and organizations to better understand the safety and health needs of firefighters and maximize the impact of NIOSH research and activities.

- *Resources*: NIOSH develops resources and tools to support firefighters and first responders in performing their duties safely and effectively in hazardous environments.

We are seeking additional input on the NIOSH priorities, research portfolio, and service activities to help protect the firefighters and other workers who face

risks from fire-related exposures, injuries, illnesses, and fatalities. Please consider addressing these questions or provide other comments you deem relevant.

(1) How can NIOSH best leverage these priority topics to help improve firefighter safety, health, and well-being and address potential challenges?

(2) What priorities, research areas and service activities could be expanded?

(3) How can NIOSH best partner with fire service organizations and related stakeholder organizations to achieve these priorities?

John J. Howard,

Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Safe Access for Victims' Economic Security Data Collection for Safety in Child Support Program Research (New Collection)

AGENCY: Office of Child Support Enforcement, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) is requesting public comments on a proposed information collection as part of the Safe Access for Victims' Economic Security (SAVES) Demonstration research on safety in the child support program. The SAVES Center, responsible for providing technical assistance and conducting evaluation for SAVES, will conduct one-time data collection activities with domestic violence (DV) survivors, advocates, and child support staff to understand their experiences and to identify barriers and promising practices related to safety in the child support system. These activities are part of ACF's efforts to improve safety in the child support program under SAVES.

DATES: *Comments due* April 3, 2026.

ADDRESSES: In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above. You can obtain copies of the

proposed collection of information and submit comments by emailing infocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: SAVES is a 5-year demonstration project funded by ACF's Office of Child Support Enforcement that aims to increase safe access to child support, parenting time, and establishment of parentage services for survivors of DV.

The project was awarded in September 2022 to child support programs in 12 states and one tribal jurisdiction and is now entering year four. It aims to support grant recipients in implementing comprehensive domestic violence safety policies, procedures, and outreach strategies to improve access to child support and parenting time services for parents who have not engaged with the child support program due to safety concerns. The overarching goal is to ensure that DV survivors who need child support services can access them safely.

As part of the research and evaluation component for SAVES, the SAVES Center is conducting a series of data collection efforts to understand the needs of DV survivors, the perspectives of DV advocates, and the implementation experiences of child support professionals at the 13 demonstration sites.

The SAVES Center proposes collecting new information to help achieve the project's goals of increasing safety in the child support program. Data collection for each instrument will occur once in year 4 of SAVES. Each respondent will respond to one instrument in year 4 and all respondents will only provide one response to one instrument. The proposed information collection will occur through the following activities:

SAVES Mixed-Methods Information Collection with DV Survivors: This includes in-depth qualitative interviews (Instrument 1: SAVES Qualitative Interviews with DV Survivors) and a quantitative online survey (Instrument 2: SAVES Quantitative Survey with DV Survivors) with DV survivors to explore their experiences with and perceptions of the child support program. The goal is to understand how safety concerns—such as the risk of re-engagement with an abusive partner, fear of retaliation, concerns about personal information being shared, or negative experiences with legal or court processes—affect survivors' decisions to engage with or avoid the child support system. By capturing both individual- and system-
