

Frequency Navy Multiband Terminals

Non-Major Defense Equipment:

The following non-MDE items will also be included: KGV-136R communications security devices; communications equipment; submarine high data rate masts; ancillary equipment; containers; integration and test support; spare and repair parts; publications and technical documentation; personnel training and training equipment; United States (U.S.) Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support.

(iv) *Military Department:* Navy (UK-P-LYN)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* November 24, 2025

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

United Kingdom—Navy Multiband Terminals

The Government of the United Kingdom has requested to buy an additional six (6) Advanced Extremely High Frequency (AEHF) Navy Multiband Terminals (NMT) that will be added to a previously implemented case whose value was under the congressional notification threshold. The original Foreign Military Sales (FMS) case, valued at \$41.02 million (\$14.63 million in MDE), included two (2) AEHF NMTs. This notification is for a combined total of eight (8) AEHF NMTs. The following non-MDE items will also be included: KGV-136R communications security devices; communications equipment; submarine high data rate masts; ancillary equipment; containers; integration and test support; spare and repair parts; publications and technical documentation; personnel training and training equipment; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$200 million.

This proposed sale will support the foreign policy and national security objectives of the U.S. by improving the security of a key NATO Ally that is an

important force for political stability and economic progress in Europe.

The proposed sale will improve the United Kingdom's capability to meet current and future threats by ensuring communications interoperability. The United Kingdom will have no difficulty absorbing these articles and services into its armed forces. The UK Royal Navy will install the NMT system aboard Dreadnought submarines to enable AEHF satellite communications to Royal Navy and Minister of Defence shore sites, ships, and submarines in a non-contested threat environment.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the United Kingdom.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No 25-95

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Advanced Extremely High Frequency Navy Multiband Terminal (AEHF NMT) is the next generation of maritime military satellite communications (SATCOM) terminal for the Navy and its coalition partners. The Navy uses it for accessing protected and survivable SATCOM over the AEHF SATCOM constellation. In addition, NMT provides access to wideband communications through the Defense Satellite Communications System (DSCS) and Wideband Global SATCOM (WGS) constellations. The NMT is interoperable with the current and legacy service SATCOM terminals, including the family of advanced beyond-line-of-sight terminals, secure mobile anti-jam reliable tactical terminals, and follow-on terminals. The NMT provides communications interoperability for at-sea assets in non-contested threat environments. The system includes AEHF communications security KGV-136R National Security Agency Type 1 releasable controlled

cryptographic items, enabling secure anti-jam communications.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the United Kingdom can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the United Kingdom.

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 25-1D. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 18-07 of July 26, 2018.

Sincerely,

Michael J. Miller
Director

BILLING CODE 6001-FR-C

Transmittal No. 25-1D

**REPORT OF ENHANCEMENT OR
UPGRADE OF SENSITIVITY OF
TECHNOLOGY OR CAPABILITY (SEC.
36(B)(5)(C), AECA)**

(i) *Prospective Purchaser:* Government of Bahrain

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 18-07

Date: July 26, 2018

Implementing Agency: Navy
Funding Source: National Funds

(iii) *Description:* On July 26, 2018, Congress was notified by congressional certification transmittal number 18-07 of the possible sale under Section 36(b)(1) of the Arms Export Control Act of items and services in support of Follow-On Technical Support (FOTS) for the Royal Bahrain Navy Ship

SABHA (FFG-90), formerly USS Jack Williams (FFG-24), transferred as Excess Defense Articles on September 13, 1996. Also included were engineering, technical, and logistics services, documentation, and modification material for United States (U.S.) Navy supplied systems and equipment and other related elements of logistics and programs support. The estimated total cost was \$70 million. There was no Major Defense Equipment (MDE) associated with this sale.

This transmittal notifies Congress of the inclusion of the following non-MDE: items and services in support of follow-on technical support (FOTS) for various vessels consisting of three classes of Royal Bahrain Navy ships and vessels transferred as excess defense articles from the U.S. Navy to the Bahrain Navy.

The following are also included: engineering, technical, and logistics services; documentation; modification material for U.S. Navy supplied systems and equipment; and other related elements of logistics and programs support. The estimated total cost of the new items is \$430 million. The estimated total case value will increase by \$430 million to a revised \$500 million. There is no MDE associated with this sale.

(iv) *Significance:* This notification is being provided as the additional non-MDE items were not enumerated in the original notification. The inclusion of these items represents an increase in capability over what was previously notified. The proposed sale will support Bahrain's defense by maintaining the

operational readiness of Bahrain navy ships.

(v) *Justification:* This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a major non-NATO ally that is an important force for political stability and economic progress in the Middle East.

(vi) *Date Report Delivered to Congress:* November 24, 2025
