

prohibiting licensees from entering into certain IRU or capacity lease arrangements, where it would give a foreign adversary-controlled entity the ability to install, own, or manage Submarine Line Terminal Equipment (SLTE) on a submarine cable landing in the United States.

On September 11, 2025, OMB approved a non-substantive change approval request related to the *Submarine Cable Report and Order*. On October 27, 2025, the Commission published a notice in the **Federal Register** announcing the effective date of the rules adopted in the *Submarine Cable Report and Order* except for amendatory instructions (§ 1.767), 7 (§ 1.768), 10 (§ 1.70002), 11 (§ 1.70003), 12 (§§ 1.70005 and 1.70006), 13 (§ 1.70007), 14 (§§ 1.70008 and 1.70009), 15 (§§ 1.70011 through 1.70013), 16 (§ 1.70016), 17 (§ 1.70017), 18 (§ 1.70020), 19 (§§ 1.70023 and 1.70024), and 22 (§ 43.82).

Relatedly, the Commission transitioned its International Communications Filing System (ICFS) to a new cloud-based platform in June 2025. Following OMB's approval of modifications to this information collection, the Commission will develop and submit for OMB review revised submarine cable application forms and new forms to comply with the new requirements. Until the new and revised electronic forms are approved by OMB, submarine cable applicants and licensees will be required to provide the information required by the *Submarine Cable Report and Order* by submitting the current application forms and providing additional information as required in an attachment filed in ICFS.

OMB Control Number: 3060–1156.

Title: 47 CFR 43.82, Annual Circuit Reports.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business and other for profit entities and State, Local or Tribal Governments.

Number of Respondents and Responses: 133 respondents; 266 responses.

Estimated Time per Response: 1 to 20 hours.

Frequency of Response: Annual reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in Sections 1, 4(i), 4(j), 201–255, 303(r), 403, 413 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 201–255, 303(r), 403, 413, and the Cable

Landing License Act of 1921, 47 U.S.C. 34–39, and Executive Order No. 10530, Section 5(a) (May 12, 1954) reprinted as amended in 3 U.S.C. 301.

Total Annual Burden: 2,793 hours.

Total Annual Cost: \$12,000.

Needs and Uses: The Federal Communications Commission (Commission) seeks approval from the Office of Management and Budget (OMB) for the revised information collection for the annual submarine cable circuit capacity reports required pursuant to the Cable Landing License Act of 1921 and section 43.82 of the Commission's rules. On August 7, 2025, the Commission adopted a Report and Order and Further Notice of Proposed Rulemaking (*Submarine Report and Order*), FCC 25–49, that modernized the Commission's submarine cable rules, including adopting new rules regarding the annual circuit capacity reports. With respect to the annual submarine cable circuit capacity data collection, the Commission modified the circuit capacity reporting requirements to enhance the quality and usefulness of the data for national security and other purposes, provide greater clarity to licensees and common carriers (Filing Entities) on the reporting requirements for Filing Entities, and eliminated duplicative burdens.

Specifically, in the *Submarine Report and Order*, the Commission streamlined the rules and eliminated the requirement for licensees to file a Cable Operator Report about the capacity on a cable and instead required Filing Entities to file one report, the Capacity Holder Report, on an individual basis. The Commission retained important information from the Cable Operator Report by integrating and clarifying information about available, planned, and design capacity that was previously reported in the Cable Operator Report. The Commission required Filing Entities to report their capacity on domestic cables, as the lack of this information created a critical gap regarding the ownership and use of capacity on submarine cables regulated by the Commission. The Commission also required Filing Entities to identify, with respect to each sale, lease, or purchase of a fiber pair and/or spectrum, the submarine cable, the U.S. and foreign landing points of the fiber pair and/or spectrum, and the entity that manages the fiber pair and/or spectrum, if different from the entity that owns it. The Commission also required Filing Entities to provide certain information about their submarine line terminal equipment (SLTEs) in the Capacity Holder Report as SLTEs are among the most important

equipment associated with the submarine cable system for national security and law enforcement purposes.

Additionally, the Commission allowed any subsidiary, parent entity, or affiliate to file the Capacity Holder Report on behalf of a licensee(s) or common carrier(s), so long as the legal name of the licensee or common carrier is identified in the report and an officer of the licensee or common carrier certifies that the information in the report is accurate and complete. The Commission codified a compliance provision in section 43.82 of the rules. The Commission modified section 43.82 of the rules to allow the Commission to share with the Committee for the Assessment of Foreign Participation in the U.S. Telecommunications Services Sector, Department of Homeland Security, and the State Department the capacity data filed on a confidential basis without the pre-notification requirements of 47 CFR 0.442(d).

The Commission directed its Office of International Affairs to revise the Filing Manual to conform with the changes adopted in the *Submarine Cable Report and Order*.
