

*Form Numbers:* N/A.

*Type of Review:* This is a review of a new information collection.

*Background:* The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on September 26, 2025 (90 FR 46457). Under the authority of section 353 of the 2024 FAA Reauthorization Act, this information collection supports the FAA efforts to evaluate airport ramp worker safety, with a focus on identifying and reducing accidents related to ingestion zones and jet blast zones. These zones present serious hazards to ground personnel, and this initiative seeks to better understand the conditions, contributing factors, and potential mitigation strategies to improve safety across U.S. airports.

Data will be collected through voluntary questionnaires distributed to airport ramp workers, ground service providers, airline operators, and safety personnel. The questionnaires will ask respondents about their experiences, observed hazards, safety training, and recommendations related to working near aircraft engines and blast areas. The FAA will use this information to identify trends, gaps in training or procedures, and opportunities for regulatory or operational improvements. Data collection will be primarily electronic, using secure online platforms to minimize the respondents' burden and ensure efficient processing. This collection supports the FAA's safety mission and fulfills a legal mandate to assess and improve workplace safety in airport operational areas.

*Respondents:* Of the airport ramp workers, ground service providers, airline operators, and safety personnel polled, it is estimated that approximately 100 will respond.

*Frequency:* Once.

*Estimated Average Burden per Response:* 2 hours.

*Estimated Total Annual Burden:* 200 hours.

Issued in Washington, DC.

*Acting Manager, Airport Safety and Operations (AAS-300).*
