II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Packaging and Transportation of Radioactive Material." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on December 12, 2025, 90 FR 57785.

1. *The title of the information collection:* Packaging and Transportation of Radioactive Material.
2. *OMB approval number:* 3150-0008.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not Applicable.

5. *How often the collection is required or requested:* On occasion. Application for package certification may be made at any time. Required reports are collected and evaluated on a continuous basis as events occur.

6. *Who will be required or asked to respond:* All NRC specific licensees who place byproduct, source, or special nuclear material into transportation, and all persons who wish to apply for NRC approval of package designs for use in such transportation.

7. *The estimated number of annual responses:* 612.

8. *The estimated number of annual respondents:* 225.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 30,739 hours (26,033 hours reporting + 4,575 recordkeeping + 131 hours third-party disclosure).

10. *Abstract:* The NRC regulations in 10 CFR part 71 establish requirements for packaging, preparation for shipment, and transportation of licensed material, and prescribe procedures, standards, and requirements for approval by NRC of packaging and shipping procedures for fissile material and for quantities of licensed material in excess of Type A quantities. The NRC collects information pertinent to 10 CFR part 71 for three reasons: to issue a package approval; to ensure that any incidents or package degradation or defects are appropriately captured, evaluated and if necessary, corrected to minimize future potential occurrences; and to ensure

that all activities are completed using an NRC-approved quality assurance program.

Dated: February 20, 2026.

For the Nuclear Regulatory Commission.

Heather Dempsey,

Acting NRC Clearance Officer, Office of the Chief Information Officer.
