

In addition, the Department uses the WD-10A form, which is a companion form to the WD-10 form. This form is used pre-survey to identify potential respondents that performed construction work within the survey period in the survey area, which enables the Department to solicit for survey participation. This pre-survey information request better identifies additional contractors that performed construction work in the survey area.

This information collection is subject to the PRA. A federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The Department obtains OMB approval for this information collection under Control Number 1235-0015.

OMB authorization for an ICR cannot be for more than 3 years without renewal, and the current approval for this collection will expire on April 30, 2026. The Department seeks to extend PRA authorization for this information collection for 3 more years, without any change to existing requirements. The Department notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.

Interested parties are encouraged to send comments to the Department at the address shown in the ADDRESSES section within 60 days of publication of this notice in the **Federal Register**. To help ensure appropriate consideration, comments should mention OMB Control Number 1235-0015.

3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not Applicable.

5. *How often the collection is required or requested:* On occasion. Application for package certification may be made at any time. Required reports are collected and evaluated on a continuous basis as events occur.

6. *Who will be required or asked to respond:* All NRC specific licensees who place byproduct, source, or special nuclear material into transportation, and all persons who wish to apply for NRC approval of package designs for use in such transportation.

The NRC collects information pertinent to 10 CFR part 71 for three reasons: to issue a package approval; to ensure that any incidents or package degradation or defects are appropriately captured, evaluated and if necessary, corrected to minimize future potential occurrences; and to ensure
