

DEPARTMENT OF ENERGY**Energy Information Administration****Agency Information Collection Request for Comments**

AGENCY: U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

ACTION: Notice.

SUMMARY: The U.S. Energy Information Administration (EIA) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register** on December 18, 2025, and no comments were received. EIA is forwarding the proposed Data Security Requirements for Accessing Confidential Data information collection to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Comments on this information collection must be received no later than March 30, 2026. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Debra Coaxum, EIA Clearance Officer, at (202) 586-7876 or by email at EIA-FRNcomments@eia.gov.

SUPPLEMENTARY INFORMATION: This information collection request contains:

- (1) *OMB No.:* 1905–New;
- (2) *Information Collection Request Title:* Data Security Requirements for Accessing Confidential Data;
- (3) *Type of Request:* Intent to seek approval to collect information from the public to fulfill the EIA security requirements allowing individuals to access confidential data assets for the purposes of building evidence.
- (4) *Purpose:* Title III of the Foundations for Evidence-Based Policymaking Act of 2018 (44 U.S.C. 3583; hereafter referred to as the Evidence Act) mandates that OMB establish a Standard Application Process (SAP) for requesting access to certain confidential data assets. While the adoption of the SAP is required for statistical agencies and units designated under the Confidential Information Protection and Statistical Efficiency Act

of 2018 (CIPSEA), it is recognized that other agencies and organizational units within the Executive Branch may benefit from the adoption of the SAP to accept applications for access to confidential data assets. The SAP is to be a process through which agencies, the Congressional Budget Office, State, local, and Tribal governments, researchers, and other individuals, as appropriate, may apply to access confidential data assets held by a Federal statistical agency or unit for the purposes of developing evidence. With the Interagency Council on Statistical Policy (ICSP) as advisors, the entities upon whom this requirement is levied are working with the SAP Project Management Office (PMO) and with OMB to implement the SAP.

The SAP Portal is to be a single web-based common application designed to collect information from individuals requesting access to confidential data assets from Federal statistical agencies and units. When an application for confidential data is approved through the SAP Portal, EIA will collect information to fulfill its data security requirements. This is a required step before providing the individual with access to restricted use microdata for the purpose of evidence building. EIA’s data security agreements and other paperwork, along with the corresponding security protocols, allow EIA to maintain careful controls on confidentiality and privacy, as required by law. EIA’s collection of data security information will occur outside of the SAP Portal.

The following bullets outline the major components and processes in and around the SAP Portal, leading up to EIA’s collection of security requirements.

The SAP Portal

The SAP Portal is an application interface connecting applicants seeking data with a catalog of data assets owned by the Federal statistical agencies and units. The SAP Portal is not a new data repository or warehouse; confidential data assets will continue to be stored in secure data access facilities owned and hosted by the Federal statistical agencies and units. The Portal will provide a streamlined application process across agencies, reducing redundancies in the application process. This single SAP Portal will improve the process for applicants, tracking and communicating the application process throughout its lifecycle. This reduces redundancies and burden on applicants that request access to data from multiple agencies. The SAP Portal will automate key tasks to save resources and time and

will bring agencies into compliance with the Evidence Act statutory requirements.

Data Discovery

Individuals begin the process of accessing restricted use data by discovering confidential data assets through the SAP data catalog, maintained by Federal statistical agencies at www.researchdatagov.org. Potential applicants can search by agency, topic, or keyword to identify data of interest or relevance. Once they have identified data of interest, applicants can view metadata outlining the title, description or abstract, scope and coverage, and detailed methodology related to a specific data asset to determine its relevance to their research. While statistical agencies and units shall endeavor to include metadata in the SAP data catalog on all confidential data assets for which they accept applications, it may not be feasible to include metadata for some data assets (e.g., potential curated versions of administrative data). A statistical agency or unit may still accept an application through the SAP Portal even if the requested data asset is not listed in the SAP data catalog.

SAP Application Process

Individuals who have identified and wish to access confidential data assets will be able to apply for access through the SAP Portal. Applicants must create an account and follow all steps to complete the application. Applicants begin by entering their personal, contact, and institutional information, as well as the personal, contact, and institutional information of all individuals on their research team. Applicants proceed to provide summary information about their proposed project, to include project title, duration, funding, timeline, and other details including the data asset(s) they are requesting and any proposed linkages to data not listed in the SAP data catalog, including non-Federal data sources. Applicants then proceed to enter detailed information regarding their proposed project, including a project abstract, research question(s), literature review, project scope, research methodology, project products, and anticipated output. Applicants must demonstrate a need for confidential data, outlining why their research question cannot be answered using publicly available information.

Submission for Review

Upon submission of their application, applicants will receive a notification that their application has been received

and is under review by the data owning agency or agencies (in the event where data assets are requested from multiple agencies). At this point, applicants will also be notified that application approval does not alone grant access to confidential data, and that, if approved, applicants must comply with the data-owning agency's security requirements outside of the SAP Portal, which may include a background check.

In accordance with the Evidence Act and the direction of the ICSP, agencies will approve or reject an application within a prompt timeframe. In some cases, agencies may determine that additional clarity, information, or modification is needed and request the applicant to "revise and resubmit" their application. Data discovery, the SAP application process, and the submission for review are planned to take place within the web-based SAP Portal. As noted above, the notice announcing plans to collect information through the SAP Portal has been published separately (87 FR 53793).

Access to Confidential Data

In the event of a positive determination, the applicant will be notified that their proposal has been accepted. The positive or final adverse determination concludes the SAP Portal process. In the instance of a positive determination, the data-owning agency (or agencies) will contact the applicant to provide instructions on the agency's security requirements that must be completed to gain access to the confidential data. The completion and submission of the agency's security requirements will take place outside of the SAP Portal.

Collection of Information for Data Security Requirements

In order for researchers to access confidential data onsite at EIA's headquarters in Washington, DC, they must fulfill all requirements for becoming temporary agents of EIA. To fulfill these requirements, a Data Access Agreement (DAA) must be signed between EIA and the researcher's employing institution, and the team members must complete EIA's CIPSEA training and sign a Non-disclosure Agreement, affirming their U.S. citizenship and their commitment not to disclose confidential data to unauthorized parties.

(5) *Annual Estimated Number of Respondents*: 20;

(6) *Annual Estimated Number of Total Responses*: 20;

(7) *Annual Estimated Number of Burden Hours*: 100;

(8) *Annual Estimated Reporting and Recordkeeping Burden*: The amount of time to complete the DAA and training will vary based on the confidential data assets requested and the access modality. To obtain access to EIA confidential data assets, it is estimated that the average time to complete and submit EIA's data security agreements is 100 minutes (5 hours) per applicant. This estimate does not include the time needed to complete and submit an application within the SAP Portal. All efforts related to SAP Portal applications occur prior to and separate from EIA's effort to collect information related to data security requirements.

Statutory Authority: 15 U.S.C. 772(b) and 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on February 23, 2026.

Debra Coaxum,

*Assistant Administrator for Energy Statistics,
U.S. Energy Information Administration.*

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26-88-000]

Golden Triangle Storage, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on February 12, 2026, Golden Triangle Storage, LLC (GTS), 919 Milam Street, Suite 2425, Houston, Texas 77002, filed in the above referenced docket, a prior notice request pursuant to sections 157.205 and 157.208 of the Commission's regulations under the Natural Gas Act (NGA), and GTS' blanket certificate issued in Docket No. CP07-415-000, for authorization to construct its Linde NG Interconnection Project (Project). Specifically, GTS proposes to: (1) construct an approximately two-mile-long, 12-inch-diameter pipeline lateral to Linde Inc.'s hydrogen facility (Linde Facility) in Jefferson County, Texas; (2) construct a new interconnect and meter site at the Linde Facility in Jefferson County, Texas; and (3) modify the existing Houston Pipe Line Company LP meter station in Orange County, Texas to increase capacity. The Project is designed to deliver 125 million cubic feet per day of firm wheeling service to a new interconnection with the Linde Facility. GTS does not propose any changes to the certificated parameters of its storage facility. GTS estimates the cost of the Project to be approximately

\$27 million, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.reference@ferc.gov.

Any questions concerning this request should be directed to James F. Bowe, Jr., King & Spalding LLP, 1700 Pennsylvania Avenue, Suite 900, Washington, DC 20006, by phone at (202) 626-9601, or by email at jbowe@kslaw.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on April 24, 2026. How to file protests, motions to intervene, and comments is explained below.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502-6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's

¹ 18 CFR 157.205.

² Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).
