information, please include the document identifier 0990-0488-30D and project title for reference.

SUPPLEMENTARY INFORMATION: OS, ASPR, and HHS, is announcing that a proposed extension of a generic information collection has been submitted to OMB for review and approval. OMB will accept further comments from the public during the review and approval period. No comments were received in the initial 60-day comment period. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the Agency’s functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Ensure a Strong Public Health Supply Chain Through Streamlined Oversight and American Priorities.

Type of Collection: Extension.

Office of Management and Budget (OMB) No. 0990-0488—Administration for Strategic Preparedness and Response—Center for Industrial Base Management and Supply Chain.

Abstract: HHS, ASPR is seeking approval by OMB on an extension of the existing clearance (OMB Control Number: 0990-0488, Expiration Date: March 31, 2026). HHS is working with the White House and across the federal interagency to launch a multiyear implementation involving the identification and coordination of measurable activities across the United States government, state, local, tribal, and territorial (SLTT) jurisdictions, and private sector partners. Cross-sectoral engagement is the underpinning of

many of the interdependent implementation activities. For example, one such activity involves information collection from SLTT partners on facility, local, and state stockpiling plans to ensure coordinated plans are in place for a future public health emergency. Potential engagements include, and are not limited to, surveys, stakeholder meetings, requests for information (RFI), town hall meetings, and workshops. With each of these different mechanisms of engagement, there is a varied frequency ranging from single engagements to regularly recurring meetings.

In 2025, the White House capacity and strengthening the public health supply chain through a series of executive actions focused on reducing foreign dependency, enhancing domestic manufacturing capacity, and improving emergency preparedness. This includes the establishment of the Strategic Active Pharmaceutical Ingredients Reserve (SAPIR), directed by HHS and managed through ASPR, to ensure a secure, domestic supply of essential drug components. The administration has also invoked Section 232 of the *Trade Expansion Act* of 1962 to assess whether reliance on imports of materials such as processed critical minerals and copper poses a national security risk, including risks to the production of pharmaceuticals and other medical countermeasures. These coordinated efforts reflect a broader federal strategy to increase the resilience, agility, and visibility of the public health supply chain in support of future emergency response operations. To support White House priorities, HHS seeks a 3-year extension to its Paperwork Reduction Act clearance and will engage with SLTT, trade groups, mixed cross-sector audiences, non-governmental organizations, manufacturers, academia, health care providers and facilities, and local communities.
