*Abstract:* The Service has overall Federal responsibility for managing the Nation's fish and wildlife resources. One of the Service's priorities is to provide the public with wildlife-based outdoor recreation opportunities on National Wildlife Refuges, National Fish Hatcheries, and other Service lands (collectively, refuges). These outdoor recreation opportunities include hunting, which is an important opportunity for people to connect with nature, harvest food, and assist the Service in managing wildlife populations.

The National Wildlife Refuge System Administration Act, as amended by the National Wildlife Refuge System Improvement Act (the Act; 16 U.S.C. 668dd *et seq.*) stipulates that refuges undergo a comprehensive conservation planning process that, among other things, must look at the compatibility of wildlife-dependent recreation (including hunting) on refuges. We will use the information from the proposed survey effort to inform planning on refuges as mandated by the Act.

Hunting on refuges is regulated by both State and Federal laws, as well as through refuge-specific regulations. These refuge-specific regulations are made in accordance with hunt plans required to be developed for each refuge. These hunt plans outline refuge-specific bag limits, season dates, areas open and closed to hunting, allowed hunting time, and other requirements. The hunt plans are an important tool that refuges use to manage harvest, safety, and visitor experience.

Creating hunt plans relies on sound biological and social data. Understanding hunter experience, preference, and harvest helps refuge managers and planners tailor hunt plans to suit biological and visitor objectives and maintain a safe environment for hunters and non-hunting visitors.

To ensure the surveys were comprehensive, the Service convened an interdisciplinary team made up of biologists, managers, visitor services specialists, social scientists, and law enforcement officers. The team identified data gaps needed to inform future hunt plan development, identified safety concerns, and considered methods to better understand hunter preference in order to improve visitor experience.

### Proposed Changes to the Survey Instruments

The Service proposes the following non-substantive changes to the existing information collections below:

1. Form 3–2557, “*Hunter Satisfaction Survey*”—

a. Big game question 2ii—The question currently reads, “What method (s) of take did you use?” To minimize confusion to respondents, we propose to change that question to “What method(s) of take did you use, regardless of whether you harvested an animal?”

b. Small game question 4—The question currently reads, “What methods did you use to hunt *small game* on the refuge?” To minimize confusion to respondents, we propose to change that question to “What method(s) of take did you use to hunt *small game* on the refuge, regardless of whether you harvested an animal?”

2. Form 3–2558, “*Spring Turkey Hunter Participation Survey*”—

a. Question 3 currently reads, “What method of take did you use to hunt turkey during the previous *spring turkey* hunting season?” To minimize confusion to respondents, we propose to change the question to “What method of take did you use to hunt turkey during the previous *spring turkey* hunting season, regardless of whether you harvested an animal?”

The public may request copies of any form or document contained in this information collection by sending a request to the Service Information Collection Clearance Officer in **ADDRESSES**, above.
