SUPPLEMENTARY INFORMATION:

Title: FERC-714, Annual Electric Balancing Authority Area and Planning Area Report.

OMB Control No.: 1902-0140.

Type of Request: Three-year extension of the FERC-714 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the FERC-714 data to analyze power system operations. These analyses estimate the effect of changes in power system operations resulting from the installation of a new generating unit or plant, transmission facilities, energy transfers between systems, and/or new points of interconnections. The FERC-714 data assists in providing a broad picture of interconnected balancing authority area operations including: comprehensive information of balancing authority area generation, actual and scheduled inter-balancing authority area power transfers, and net energy for load, summer and winter generation peaks and system lambda. The Commission also uses the data to prepare status reports on the electric utility industry including a review of inter-balancing authority area bulk power trade information. The Commission uses the collected data from planning areas to monitor forecasted demands by electric utilities with fundamental demand responsibilities and to develop hourly demand characteristics.

Type of Respondent: Electric utility balancing authorities and planning areas in the United States.

*Estimate of Annual Burden:*¹ The Commission estimates the annual public reporting burden and cost² (rounded) for the information collection as follows:

Accountants and Auditors (Code 13-2011), \$55.03/hr.

Transportation, Storage, and Distribution Managers (Code 11-3071), \$84.39/hr.

¹ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.
