II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Collection of Research Code Non-Disclosure Agreement Information." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on November 26, 2025, 90 FR 54404.

1. *The title of the information collection:* Collection of Research Code Non-Disclosure Agreement Information.
2. *OMB approval number:* 3150-0240.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not Applicable.

5. *How often the collection is required or requested:* The collection is required every time an NRC developed code is requested by users.

6. *Who will be required or asked to respond:* Users of the code from domestic and foreign licensees, universities, corporations, and members of the public, as well as foreign technical support organizations.

7. *The estimated number of annual responses:* 962.

8. *The estimated number of annual respondents:* 962.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 962.

10. *Abstract:* This information collection request is a non-disclosure agreement (NDA) used for domestic and foreign entities to obtain and use the NRC's nuclear safety analytical computer codes. NRC develops and uses computer codes to independently model and evaluate safety issues associated with the licensed use of radioactive materials. As a global leader in nuclear regulatory research and safety assessment, NRC is frequently approached by domestic and international organizations requesting copies of NRC computer codes. In general, to obtain an NRC code an individual or organization first agrees to not redistribute the code (*i.e.*, non-

disclosure) through an NDA. The NDA also imposes terms and conditions for code use, and requires notification to NRC of code errors, code modifications, and updated user information. An officially signed and executed NDA of users agreeing to the terms and conditions is current NRC practice for access to NRC-developed computer codes. Once the NDA has been signed, received, reviewed, and accepted, the requesting individual or organization is given access to the requested code. The information collection enables the NRC to ensure that proper procedures and agreements are in place to guide the distribution and use of these codes according to NRC and U.S. Government policies and international agreements such as import-export restrictions and intellectual property rights. Further information collection on code errors and modifications by code users permits NRC to maintain control and quality of its codes in a timely and efficient manner.
