

brucellosis-free cattle and bison interstate and internationally. This management area and testing system also enhances the effectiveness of the Brucellosis Eradication Program by decreasing the likelihood that infected animals will be moved interstate or internationally.

The creation of brucellosis management areas allows States that have found *B. abortus* in wildlife (which are nonregulated animals) to mitigate the risk of transmission and spread of disease while maintaining the State's disease-free status in regulated domestic livestock. The State must sign a memorandum of understanding with the APHIS Administrator that describes its brucellosis management plan. The brucellosis management plan developed by the State must define the geographic brucellosis management area and describe the surveillance and mitigation activities that the State will conduct to identify occurrence of *B. abortus* in domestic livestock and wildlife and potential risks for spread of the disease.

We are asking Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years. APHIS has amended this information collection by increasing the number of Responses and Total Burden Hours being reported for the collection.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.26 hours per response.

Respondents: Commercial livestock farm owners and managers; animal agriculture-related business owners and managers; private veterinarians; animal agriculture-related agencies and organizations; breed registry agencies;

agriculture extension agents; fair and exhibition officials; owners, operators, and managers of livestock markets; owners, operators, and managers of slaughter establishments and dairy plants; and State animal health officials and laboratory personnel (including wildlife biologists).

Estimated annual number of respondents: 87,974.

Estimated annual number of responses per respondent: 11.

Estimated annual number of responses: 956,044.

Estimated total annual burden on respondents: 246,575 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of March 2026.

Kelly Moore,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-28-2026]

Foreign-Trade Zone (FTZ) 46, Notification of Proposed Production Activity; Patheon API, Inc., (Pharmaceutical Products); Cincinnati, Ohio

Patheon API, Inc., submitted a notification of proposed production activity to the FTZ Board (the Board) for its facilities in Cincinnati, Ohio within Subzone 46K. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on March 9, 2026.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via www.trade.gov/ftz. The proposed finished product(s) and material(s)/component(s) would be added to the production authority that the Board previously approved for the

operation, as reflected on the Board's website.

The proposed finished product is agonist treatment drug for ulcerative colitis (API Ono-6414HY) (duty-free).

The proposed foreign-status material/component is 2-([2-((2R)-2-((1E,3S)-3-Hydroxy-8-((pyridin-2-yl)sulfanyl]oct-1-en-1-yl)-5-oxopyrrolidin-1-yl)ethyl)sulfanyl]-1,3-thiazole-4-carbonyl)amino}ethane-1-sulfonic acid monohydrate, active pharmaceutical ingredient (duty rate 6.5%).

The request indicates that the material/component is subject to duties under section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is April 22, 2026.

A copy of the notification will be available for public inspection in the "Online FTZ Information System" section of the Board's website.

For further information, contact Christopher Wedderburn at Chris.Wedderburn@trade.gov.

Dated: March 10, 2026.

Elizabeth Whiteman,

Executive Secretary.
