Abstract of Proposed Collection

The information collected from individuals and organizations is used to conduct screening to ensure that State funded activities do not provide support

to entities or individuals deemed to be a risk to national security.

Methodology

The State Department has implemented a Risk Analysis and Management Program to vet potential contractors and grantees seeking funding from the Department of State to mitigate the risk that such funds might benefit entities or individuals who present a national security risk. To conduct this vetting program the Department collects information from contractors, sub-contractors, grantees and sub-grantees regarding their directors, officers and/or key employees through electronic submission. The information collected is compared to information gathered from commercial, public, and U.S. government databases to determine the risk that the applying organization, entity or individual might use Department funds or programs in a way that presents a threat to national security.

Seth E. Green,

Deputy Assistant Secretary, Bureau of Administration, Department of State.
