#### SUPPLEMENTARY INFORMATION:

##### I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, “Final environmental impact statement—notice of availability,” the NRC is making available to the public “Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 11, Second Renewal, Regarding Subsequent License Renewal for St. Lucie Plant, Units 1 and 2, Final Report” regarding the proposed SLR of Renewed Facility Operating License Nos. DPR–67 and NPF–16 for St. Lucie, Units 1 and 2, respectively, for an additional 20 years of operation. A notice of availability of the draft EIS was published in the **Federal Register** (FR) on January 9, 2026 (91 FR 1005). The U.S. Environmental Protection Agency also issued its notice of availability of the draft EIS on January 9, 2026 (91 FR 997). The public comment period on the draft EIS ended on February 23, 2026, and the comments received on the draft EIS are addressed in the final EIS.

##### II. Discussion

The draft EIS was issued in December 2025. The final EIS addresses the comments received on the draft EIS. As discussed in Chapter 4 of the final EIS, the NRC staff has determined that the adverse environmental impacts of SLR for St. Lucie (*i.e.*, the continued operation of St. Lucie for a period of 20 years beyond the expiration dates of the renewed facility operating licenses) are not so great that preserving the option of SLR for energy-planning decision-makers would be unreasonable. This

recommendation is based on: (1) the analysis and findings in NUREG-1437, Revision 2, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Final Report,” dated August 2024; (2) information in the environmental report, as supplemented, and other documents submitted by FPL; (3) consultation with Federal, State, and local governmental agencies and Indian Tribes; (4) the NRC staff’s independent environmental review; and (5) the NRC staff’s consideration of public comments received during the scoping process and on the draft EIS.

Dated: March 16, 2026.

For the Nuclear Regulatory Commission.

[Docket Nos. 05200051, 05200052, 05200053, and 05200054; NRC-2026-0100]

### **Fermi America LLC (dba Fermi America); Project Matador Advanced Energy and Intelligence Campus AP1000 Units 1-4, Project Matador Nuclear Units 1-4; Notice of Intent To Conduct Scoping Process and Prepare an Environmental Impact Statement**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice; request for comment.

**SUMMARY:** Pursuant to the National Environmental Policy Act (NEPA) of 1969, the U.S. Nuclear Regulatory Commission (NRC) announces its intent to prepare an environmental impact statement (EIS) to evaluate the potential environmental impacts associated with Fermi America’s Combined License (COL) application for the proposed construction and operation of four AP1000 advanced passive pressurized-water reactors—designated as Project Matador Nuclear (PMN) Units 1-4 (PMN Units 1-4). PMN Units 1-4 would be located at the Project Matador Advanced Energy and Intelligence Campus (Project Matador campus). The NRC is initiating a 30-day public scoping period to gather input on the scope of the EIS. The NRC invites public comments to identify potential alternatives, environmental concerns, relevant information and analyses, and specific issues to be addressed in the EIS. The NRC encourages the public to provide feedback related to the scope of the

proposed Federal action, whether to issue combined licenses to Fermi America for the construction and operation of four AP1000 reactors, PMN Units 1-4, at the Project Matador campus.

**DATES:** The public may submit comments on the scope of the EIS by April 20, 2026. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Further information regarding the proposed applications can be found in Section V of this notice, “Virtual Project Information and Engagement.”
