#### SUPPLEMENTARY INFORMATION:

*Title; Associated Form; and OMB Number:* Challenges of Operational Environments Study; OMB Control Number 0703-0100.

*Needs and Uses:* Recent suicide clusters aboard Naval vessels have highlighted a critical need to better understand risk factors for suicide among various shipboard environments (e.g., in maintenance yards, at sea). Unfortunately, extremely limited research to date has identified individual and organizational factors that are directly associated with harmful behaviors, including suicidality, in a variety of Naval environments. In response, the Office of Naval Research and the Defense Health Agency have funded a longitudinal study called the Challenges of Operational Environments Study to identify specific shipboard stressors associated with different phases of the aircraft carrier life cycle and determine the effects of these stressors on Sailor's mental and behavioral health and readiness. Research is needed to provide the Navy with in-depth information on specific risks to Sailors at each phase of the carrier cycle, such that allocation of resources to prevent suicidality and other mental/behavioral health problems can be tailored to meet potentially unique needs at each phase. Additionally, findings from the effort are used to develop targeted recommendations to improve Sailor mental health and well-being that are provided directly to Navy leaders. To date, this research has resulted in over

10 operational briefs to Navy leaders, and its findings have been incorporated into the Chief of Naval Operations NAVPLAN. Based on feedback received throughout the course of study implementation and to ensure continued alignment with Navy and Department of War priorities, the study team is seeking to update the previously approved survey measures to include additional questions regarding operational stressors and other threats to the readiness and performance of Navy Sailors. Because we cannot fully anticipate a specific command's evolving needs or accommodate urgent ad hoc data collection requests from leadership, we are seeking a Generic Clearance that will extend the approval of the core methodology while granting the study team the necessary adaptability to respond to stakeholder requirements in a timely manner. To support this Generic Clearance request, the burden allotment estimates below provide a projection of the maximum anticipated potential time and cost based on 6 annual data collections (3 ships, 2 data collections/ship) over a 3-year period of performance (18 total) and may not reflect the actual burden over 3 years.

*Affected Public:* Individuals or households.

The data collected for the development of the Teacher Cancellation Low Income Directory provides web-based access to a list of all elementary and secondary schools, and educational service agencies that serve a total enrollment of more than 30 percent low income students (as defined under Title I, Part A of the Elementary and Secondary Education Act of 1965, as amended). The Directory allows post-secondary institutions to determine whether or not a teacher, who received a Federal Perkins Loan, Direct Loan, or Federal Family Education Loan at their school, is eligible to receive loan
