ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[EPA-R04-RCRA-2025-1577; FRL-13183-01-R4]

Florida: Final Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Florida has applied to the Environmental Protection Agency (EPA) for final authorization of changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA), as amended. The EPA has reviewed Florida's application and has determined, subject to public comment, that these changes satisfy all requirements needed to qualify for final authorization. Therefore, in the "Rules and Regulations" section of this **Federal Register**, we are authorizing Florida for these changes as a final action without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule.

DATES: Comments must be received on or before April 27, 2026.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R04-RCRA-2025-1577, at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be

edited or removed from www.regulations.gov. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www.epa.gov/dockets/commenting-epa-dockets>.

The EPA encourages electronic submittals, but if you are unable to submit electronically or need other assistance, please contact Leah Davis, the contact listed in the **FOR FURTHER INFORMATION CONTACT** section. Please also contact Leah Davis if you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you.

All documents in the docket are listed in the www.regulations.gov index. Publicly available docket materials are available electronically in www.regulations.gov. For alternative access to docket materials, please contact Leah Davis, the contact listed in

the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Leah Davis; RCRA Programs and Cleanup Branch; Land, Chemicals and Redevelopment Division; U.S. Environmental Protection Agency; Atlanta Federal Center, 61 Forsyth Street SW, Atlanta, Georgia 30303-8960; telephone number: (404) 562-8562; fax number: (404) 562-9964; email address: davis.leah@epa.gov.

SUPPLEMENTARY INFORMATION: This document proposes to take action on Florida's changes to its hazardous waste management program under the Resource Conservation and Recovery Act (RCRA), as amended. We have published a final action authorizing these changes in the "Rules and Regulations" section of this **Federal Register** because we view this as a noncontroversial action and anticipate no adverse comment. We have explained our reasons for this action in the preamble to the final action.

If we receive no adverse comment, we will not take further action on this proposed rule. If we receive adverse comment, we will either publish a withdrawal notification promptly in the **Federal Register** informing the public that the final action will not take effect, or we will publish a notification containing a response to comments that either reverses the decision or affirms that the final action will take effect. In the event that the final action is withdrawn, we would address all public comments and make a final decision on authorization in a subsequent final action.

We do not intend to institute a second comment period on this action. Any

parties interested in commenting must do so at this time. For further information, please see the information provided in the **ADDRESSES** section of this document.

Dated: March 9, 2026.

Kevin J. McOmber,

Regional Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 260323–0088]

RIN 0648–B035

Fisheries of the Northeastern United States; Northeast Skate Complex; 2026–2028 Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes 2026 through 2028 specifications for the Northeast skate fishery. This action would set skate catch limits for fishing year 2026, project catch limits for fishing years 2027 through 2028, and increase per trip possession limits for the wing and bait fisheries. This proposed action is necessary to establish skate specifications consistent with the most recent scientific information. The intent of this action is to establish appropriate catch limits for the skate fishery while providing additional operational flexibility to fishery participants.

DATES: Comments must be received by April 10, 2026. As explained further below, NMFS finds that a 15-day comment period for this action provides a reasonable opportunity for public participation in this action pursuant to Administrative Procedure Act section 553(c) (5 U.S.C. 553(c)), while also ensuring that the final specifications and possession limits are in place as close as possible to the start of the 2026 skate fishing season on May 1.

ADDRESSES: The New England Fishery Management Council (Council) has prepared a supplemental information report (SIR) that describes the proposed action and compares it to the alternatives and analyses presented in the environmental assessment (EA) that was prepared for Framework

Adjustment 12 to the Northeast Skate Complex Fishery Management Plan (FMP). The SIR considers whether there are any substantial changes or significant new circumstances or information that are relevant to environmental concerns and could affect the proposed action or its impacts. Based on the analysis presented in the SIR, NMFS has determined that the Framework Adjustment 12 EA does not require supplementation. The SIR also includes a Regulatory Impact Review (RIR) and economic analysis. Copies of the proposed skate fishery specifications for fishing years 2026–2028, SIR, and other supporting documents are available on the Council website at <https://www.nefmc.org/library/2026-2027-skate-specifications> and upon request from Dr. Cate O’Keefe, Executive Director, New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950.

A plain language summary of this proposed rule is available at <https://www.regulations.gov/docket/NOAA-NMFS-2025-1593>. You may submit comments on this document, identified by NOAA–NMFS–2025–1593, by the following method:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Visit <https://www.regulations.gov> and type NOAA–NMFS–2025–1593 in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on <https://www.regulations.gov> without change. All personal identifying information (e.g., name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Caroline Potter, Fishery Resource Management Specialist, (978) 281–9325.

SUPPLEMENTARY INFORMATION:

Background

The FMP sets management parameters for a complex of seven skate species (barndoor, clearnose, little, rosette, smooth, thorny, and winter) off the New England and mid-Atlantic coasts. Skates support two different targeted fisheries,

one for food (the wing fishery) and one for bait in other fisheries (the bait fishery). The FMP requires that annual catch and possession limits for the skate fishery be reviewed and established through the specifications process. Framework Adjustment 12 to the Northeast Skate Complex FMP (Framework 12) (89 FR 58076, July 17, 2024) set management measures and specifications for the skate fishery for fishing year 2024 and projected specifications for fishing year 2025. A subsequent final rule (90 FR 16467, April 18, 2025) finalized the projected specifications for fishing year 2025.

Proposed Measures

Consistent with the Council’s recommendations, this action proposes increasing the 2026 and 2027 acceptable biological catch (ABC) and annual catch limit (ACL) to 41,282 metric tons (mt) (compared to 32,155 mt in 2025). The total allowable landings (TAL) would be 20,966 mt (compared to 15,718 mt in 2025); based on the proportional allocations prescribed in the FMP, the wing TAL would be 13,943 mt (compared to 10,453 mt in 2025), and the bait TAL would be 7,024 mt (compared to 5,266 mt in 2025). For fishing years 2026 and 2027, the ABC would be a 28-percent increase over the ABC for years 2024 and 2025. This action would decrease the ABC for fishing year 2028 by 10 percent from fishing years 2026 and 2027 in order to account for uncertainty in the future biomass trend. Thus, for 2028, this action proposes an ABC and an ACL of 37,154 mt. The 2028 TAL would be 18,800 mt; the wing TAL would be 12,502 mt; and the bait TAL would be 6,298 mt. A comparison of the current 2024–2025 and the proposed 2026–2028 specifications is provided below in table 1.

The Council will review the projected 2027 and 2028 specifications to determine if any changes need to be recommended prior to fishing years 2027 and 2028, respectively. NMFS will publish a notice prior to each fishing year to confirm these limits as projected or, if changes are necessary, NMFS may publish a proposed rule.

Skate regulations (50 CFR 648.320(a)(4)) indicate that specifications can be set for a period of up to two fishing years. However, in November 2025, the Council submitted a concurrent omnibus management flexibility amendment that, in part, would allow extending the time period for setting skate specifications for up to five years. Thus, setting projected specifications through 2028 as provided in this proposed rule is contingent on
