A permit may require compensatory mitigation when the Service determines, according to the best available information, that the take authorized by the permitted activity is not consistent with maintaining the persistence of the local area population of an eagle species.

(28) *Single Application for Multiple Activities* (50 CFR 13.11(d)(2))—If regulations require more than one type of permit for an activity and permits are issued by the same office, the issuing office may issue one consolidated permit. Applicants may submit a single application in these cases, provided the single application contains all the information required by the separate applications for each permitted activity. In instances where the Service consolidates more than one permitted activity into one permit, the issuing office will charge the highest single fee for the activity permitted. Administration fees are not waived for single applications covering multiple activities.

With some exceptions, the ESA prohibits certain activities with listed species unless Federal authorization is issued that allows such activities. Permits issued under section 10(a)(1)(A) of the ESA allow otherwise prohibited activities for scientific purposes or to enhance the propagation or survival of the affected species. Service regulations regarding prohibited activities with endangered species, captive-bred wildlife registrations, and permits for any activity otherwise prohibited by the ESA with respect to any endangered species are available in title 50 of the Code of Federal Regulations in part 17.

III. Permit Application

We invite comments on the following application.
