Abstract of Information Available

Human remains representing, at least, one individual have been identified. The one associated funerary object is an embedded projectile point. Ancestral remains were transferred to the Department in 2016 by the Brevard Museum of History and Natural Science, Cocoa, Florida. A private citizen, Dr. Shamsolmolouk of Vero Beach, Florida, donated the remains to the Museum in 1991. Records transferred with the remains indicate that they were removed from "the third burial level of Mound #2 of seven mounds, six being burial places at the head of the Suwanee River" by a Jimmie R. Hardin of Gray, Georgia on 12.03.1972. The exact site the Ancestor was removed from could not be identified; however, it is likely somewhere in Clinch or Charlton County, Georgia where the headwaters of the Suwanee River begin.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and

associated funerary objects described in this notice.
