

season will be 147 days. This is 19 days longer than the 2025 season (90 FR 20127, May 12, 2025; 90 FR 55513, December 12, 2025).

NMFS considered season length projections based on average catch rates for 2021–2023, 2021–2025, and 2023–2025, and using only 2025 preliminary landings. This resulted in a range of season lengths from 97 to 214 days. NMFS decided to set the season at 147 days based on catch rates from the 2023–2025 fishing seasons, which takes into account the variability during the most recent 3-year time period. Therefore, the 2026 recreational season for the Federal for-hire component will begin at 12:01 a.m., local time, on June 1, 2026, and close at 12:01 a.m., local time, on October 26, 2026.

On and after the effective date of the Federal for-hire component closure, the bag and possession limits for red snapper for Federal for-hire vessels are zero. When the Federal for-hire component is closed, these bag and possession limits apply in the Gulf on board a vessel for which a valid Federal for-hire permit for Gulf reef fish has been issued, without regard to where such species were harvested, *i.e.*, in state or Federal waters. In addition, a person aboard a vessel that has been issued a charter vessel/headboat permit for Gulf reef fish any time during the fishing year may not harvest or possess red snapper in or from the Gulf EEZ when the Federal charter vessel/headboat component is closed.

NMFS will monitor landings of the Federal for-hire component for red snapper during the 2026 fishing season. If landings of the for-hire component from the season are less than that of the component ACT, then NMFS may reopen the fishing season to allow harvest of the remaining component ACT (50 CFR 622.8(c)).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is taken under 50 CFR 622.41(q)(2)(i) and (ii), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt

from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the rules implementing the red snapper for-hire quota and ACT, and the requirement to close the for-hire component when its ACT is projected to be reached have already been subject to notice and comment, and all that remains is to notify the public of the closure. Such procedures are contrary to the public interest because many for-hire operations book trips for clients in advance and require as much notice as NMFS is able to provide to adjust their business plans to account for the fishing season.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 31, 2026.

David R. Blankinship,

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 260305–0067; RTID 0648–XF647]

Fisheries of the Exclusive Economic Zone off Alaska; Gulf of Alaska; Final 2026 and 2027 Harvest Specifications for Groundfish; 2026 Rockfish Program Cooperative Allocations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule.

SUMMARY: NMFS is providing notification for the Rockfish Program

cooperative allocations as described in the final rule that published on March 11, 2026, implementing the final 2026 and 2027 harvest specifications and prohibited species catch limits for the groundfish fishery of the Gulf of Alaska (GOA). These allocations are necessary to provide the Rockfish Program cooperative amounts for 2026, thus allowing commercial fishermen to maximize their economic opportunities in this fishery. This notification comports with the Fishery Management Plan for Groundfish of the GOA (FMP).

DATES: Effective 1200 hours, Alaska local time (A.l.t.), April 1, 2026, through 1200 hours, A.l.t., December 31, 2026.

FOR FURTHER INFORMATION CONTACT: Abby Jahn, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the FMP prepared and recommended by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR parts 679 and 680.

As described in the final 2026 and 2027 harvest specifications for groundfish of the GOA, allocations among vessels belonging to catcher vessel (CV) cooperatives or catcher/processor (CP) cooperatives are not included in the final harvest specifications (91 FR 11902, March 11, 2026). Rockfish Program applications for CV cooperatives and CP cooperatives are not due to NMFS until March 1 of each calendar year; therefore, NMFS cannot calculate 2026 and 2027 Rockfish Program cooperative allocations in conjunction with the final harvest specifications (§ 679.81(f)). NMFS has received the 2026 Rockfish Program applications and has calculated the 2026 allocations for CV cooperatives and CP cooperatives, as set forth in § 679.81(b), (c), (d), and (e). NMFS is listing the 2026 allocations in table 1.

TABLE 1—2026 ROCKFISH PROGRAM COOPERATIVE ALLOCATIONS

Cooperative	Rockfish program species	2026 allocation
Rockfish Program Entry Level	Pacific Ocean Perch	5
	Northern Rockfish	5
	Dusky Rockfish	50
Gulf of Alaska Best Use Cooperative (CP)	Pacific Ocean Perch	9,544.93
	Northern Rockfish	1,300.08
	Dusky Rockfish	1,971.90
	Pacific cod	0
	Rougheye/Blackspotted rockfish	215.46
	Sablefish	337.73

TABLE 1—2026 ROCKFISH PROGRAM COOPERATIVE ALLOCATIONS—Continued

Cooperative	Rockfish program species	2026 allocation
North Pacific Rockfish Cooperative (CV)	Shortraker rockfish	75.60
	Thornyhead rockfish	156.35
	Halibut PSC	74.10
	Pacific Ocean Perch	2,117.62
	Northern Rockfish	219.98
	Dusky Rockfish	395.13
	Pacific cod	107.85
	Rougheye/Blackspotted rockfish	0
	Sablefish	85.70
	Shortraker rockfish	0
OBSI Rockfish Cooperative (CV)	Thornyhead rockfish	6.08
	Halibut PSC	15.41
	Pacific Ocean Perch	3,075.36
	Northern Rockfish	449.57
	Dusky Rockfish	790.72
	Pacific cod	180.79
	Rougheye/Blackspotted rockfish	0
	Sablefish	143.66
	Shortraker rockfish	0
	Thornyhead rockfish	10.19
Silver Bay Seafoods Rockfish Cooperative (CV)	Halibut PSC	25.83
	Pacific Ocean Perch	4,294.73
	Northern Rockfish	515.94
	Dusky Rockfish	856.05
	Pacific cod	228.87
	Rougheye/Blackspotted rockfish	0
	Sablefish	181.86
	Shortraker rockfish	0
	Thornyhead rockfish	12.89
	Halibut PSC	32.70
Star of Kodiak Rockfish Cooperative (CV)	Pacific Ocean Perch	5,318.37
	Northern Rockfish	758.43
	Dusky Rockfish	1,213.20
	Pacific cod	303.50
	Rougheye/Blackspotted rockfish	0
	Sablefish	241.16
	Shortraker rockfish	0
	Thornyhead rockfish	17.10
	Halibut PSC	43.36

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. Through previous actions, the FMP and regulations are designed to authorize NMFS to take this action. See 50 CFR part 679. This action is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be unnecessary and contrary to the public interest. This notification provides information on the 2026 Rockfish Program cooperative allocations, and does not change operating practices in the fisheries. This notification is consistent with the harvest specifications recommended by the Council in December 2025 and implemented by NMFS in the final rule for the 2026 and 2027 harvest specifications (91 FR 11902, March 11, 2026). Those harvest specifications

specify the final total allowable catch (TAC) limits from which NMFS calculates the Rockfish Program cooperative allocations based on existing regulations, which were implemented through prior notice and comment rulemaking (§ 679.81(b), (c), (d), and (e)). The public was provided with notice and opportunity to comment during the public comment period for the proposed harvest specifications (90 FR 58185, December 16, 2025) and has had notice of the final harvest specifications implementing the final TAC limits (91 FR 11902, March 11, 2026). Because the public already had a meaningful opportunity to comment on the TAC limits from which these allocations are derived, further opportunity for public comment is unnecessary and would not be meaningful.

This notification announces the Rockfish Program cooperative allocations based on applications received after the publication of the 2026 and 2027 harvest specifications. If

this notification is delayed to allow for notice and comment it could also result in confusion for participants in the Rockfish Program given that the final rule implementing the 2026 and 2027 harvest specifications is effective as of March 17, 2026, and the Rockfish Program fishery opens April 1, 2026.

There is good cause under 5 U.S.C. 553(d)(3) to establish an effective date less than 30 days after date of publication. This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.
