

burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Formula Grant EASIE Electronic Application System for Indian Education.

*OMB Control Number:* 1810-0021.

*Type of Review:* An extension without change of a currently approved ICR.

*Respondents/Affected Public:* State, Local, and Tribal Governments.

*Total Estimated Number of Annual Responses:* 11,300.

*Total Estimated Number of Annual Burden Hours:* 4,900.

*Abstract:* This is an extension request for the Part I of grant applications for the Formula Grants to Local Educational Agencies Program (ALN 84.060A) and includes the Indian Parent Committee Approval form that is a part of the OMB approved 1810-0021 collection. The Indian Education Formula Grant (ALN 84.060A) provides support to LEAs and Indian Tribes in developing elementary school and secondary school programs for all Indian students. Program funding must be used to support comprehensive programs that are designed to meet cultural, language, and academic needs of Indian students and ensure they meet State academic standards. LEAs must develop projects with the participation and written approval of an Indian Parent Committee (IPC) and develop meaningful consultation and ongoing collaboration with nearby Indian Tribes. The instructions in this hard-copy representation of the application package can be used in developing Part I of your application. All applications must be submitted on-time to ED's provided electronic application system.

## DEPARTMENT OF EDUCATION

[Docket No.: ED-2026-SCC-1057]

### Agency Information Collection Activities; Comment Request; Annual Report of Children in State Agency and Locally Operated Institutions for Neglected and Delinquent Children

**AGENCY:** Office of Elementary and Secondary Education (OESE), Department of Education (ED).

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act (PRA) of

1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

**DATES:** Interested persons are invited to submit comments on or before April 3, 2026.

**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED-2026-SCC-1057. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the [www.regulations.gov](http://www.regulations.gov) site is not available to the public for any reason, the Department will temporarily accept comments at [ICDocketMgr@ed.gov](mailto:ICDocketMgr@ed.gov). Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 4C112, Washington, DC 20202.

**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Victoria Rosenboom, 202-987-1625.

**SUPPLEMENTARY INFORMATION:** The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the

information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Annual Report of Children in State Agency and Locally Operated Institutions for Neglected and Delinquent Children.

*OMB Control Number:* 1810-0060.

*Type of Review:* An extension without change of a currently approved ICR.

*Respondents/Affected Public:* State, Local, and Tribal Governments.

*Total Estimated Number of Annual Responses:* 2,812.

*Total Estimated Number of Annual Burden Hours:* 4,061.

*Abstract:* The U.S. Department of Education (ED) is requesting a three-year extension of the Annual Report of Children in Institutions for Neglected or Delinquent Children, Adult Correctional Institutions, and Community Day Programs for Neglected and Delinquent Children. Approval of this form is needed in order to continue the ongoing collection of data used to allocate funds authorized under Title I, Part A and Title I, Part D, Subparts 1 and 2 of the Elementary and Secondary Education Act of 1965 (ESEA). Title I, Part A provides formula grants to local educational agencies (LEAs), through State educational agencies (SEAs), to improve the teaching and learning of at-risk students in high-poverty schools. In order to calculate Title I, Part A allocations, ED must annually collect data on the number of children living in locally operated institutions for neglected or delinquent (N or D) children.

**Ross Santy,**

*Chief Data Officer, Office of Planning, Evaluation and Policy Development.*

## DEPARTMENT OF ENERGY

### Energy Information Administration

#### Agency Information Collection Extension

**AGENCY:** U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

**ACTION:** Notice.

**SUMMARY:** EIA submitted an information collection request for extension as required by the Paperwork Reduction Act of 1995. The information collection

requests a three-year extension of its Petroleum Supply Reporting System (PSRS), OMB Control Number 1905–0165. The PSRS consists of seven weekly surveys that make up the Weekly Petroleum Supply Reporting System (WPSRS), eight monthly surveys that make up the Monthly Petroleum Supply Reporting System (MPSRS), and two annual surveys, one of which is a proposed new standby survey.

**DATES:** Comments on this information collection must be received no later than May 4, 2026. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

**FOR FURTHER INFORMATION CONTACT:** If you need additional information, contact Debra Coaxum, U.S. Energy Information Administration Clearance Officer, at (202) 586–7876. The forms and instructions are available on EIA’s website at [www.eia.gov/survey/](http://www.eia.gov/survey/).

**SUPPLEMENTARY INFORMATION:** EIA uses WPSRS surveys to collect data from a sample of operators on input, production, imports, and inventory levels of crude oil, hydrocarbon gas liquids, petroleum products, and biofuels. EIA uses MPSRS surveys to collect data from all in-scope operators on input, production, imports, biofuel feedstocks consumed, refinery capacity, biofuel plant production capacity, and fuels consumed in plant operations of crude oil, hydrocarbon gas liquids petroleum products, and biofuels. EIA uses annual Form EIA–820 to collect data on refinery capacity, refinery fuels and feedstock consumed, and the quantity of crude oil received by method of transportation. EIA will use annual standby Form EIA–830 to collect data on storage capacity at refineries, crude oil tank farms, and terminals.

This information collection request contains

- (1) OMB No. 1905–0165;
- (2) *Information Collection Request Title:* Petroleum Supply Reporting System;
- (3) *Type of Request:* Three-year extension with changes;
- (4) *Purpose:* The surveys included in the PSRS collect information that is largely unavailable from other sources on production, input, inventory levels, imports, inter-regional movements, and fuels and feedstock consumed for plant operation, for crude oil, hydrocarbon gas liquids, petroleum products, and

biofuels. PSRS surveys also collect storage capacities for crude oil, hydrocarbon gas liquids, petroleum products, and biofuels, refinery capacities, biofuel production capacities, and biofuel feedstocks consumed.

EIA requires data from PSRS surveys to meet the requirements of energy data users for credible, reliable, and timely energy information. EIA uses PSRS survey data in statistical reports including, but not limited to, the Weekly Petroleum Status Report (WPSR), Petroleum Supply Monthly (PSM), and the Monthly Energy Review (MER). EIA uses PSRS survey data to support analysis and projection work with results reported in the Short-Term Energy Outlook (STEO), Annual Energy Outlook (AEO), and other reports. EIA makes reports available at <https://www.eia.gov/>. EIA also uses PSRS data to complete monthly and annual reports of U.S. petroleum and biofuel supplies to the International Energy Agency to support U.S. participation as an IEA member country. In some cases, agencies outside of EIA publish data sourced from PSRS surveys in their own reports: for example, bioenergy statistics reported by the U.S. Department of Agriculture.

Data from PSRS surveys provide data to inform policy and business decisions. The data promote efficient markets by providing transparency to petroleum and biofuel supplies. Use of PSRS data by academic researchers, educators, news media, and the general public promotes understanding of energy and its interaction with the economy and the environment.

(4a) *Proposed Changes to Information Collection:*

EIA proposes minor modifications to all PSRS survey instructions to align the language with other PSRS surveys, without substantially changing the intention of the language.

**Form EIA–804, Weekly Imports Report (Change to Form)**

- EIA proposes updating the list of countries in Part 4 Total U.S. Crude Oil Imports by Country of Origin of the Form EIA–804. The current country list is out-of-date, demonstrating significant reductions in import volumes from listed countries and significant contributions to import volumes from unlisted countries, resulting in respondents reporting most of their imports in the Other category. EIA proposes removing Azerbaijan, China, Indonesia, Oman, and Thailand, replacing these five countries with Guyana, Kazakhstan, United Arab Emirates (UAE), Ghana, and Senegal.

This change in the list of origin countries will improve EIA’s published snapshot of U.S. crude oil trade in the *Weekly Petroleum Status Report (WPSR)*.

**Form EIA–819, Monthly Report of Fuels From Non-Biogenic Waste and Biofuels (Change to Form and Instructions)**

EIA proposes three modifications to Form EIA–819 form and instructions:

1. EIA proposes changing the name of the form from *Monthly Biofuels Fuel Oxygenates, Isooctane, and Isooctene Report to Monthly Report of Fuels from Non-Biogenic Waste and Biofuels* to allow the data collection to evolve with industry changes in non-traditional technologies and feedstocks to produce fuels to supplement traditional petroleum fuels.

2. EIA proposes revision of the disclosure language in the instructions to align treatment of EIA–819 data with that of all other PSRS surveys. The current disclosure rules for feedstock consumption are a remnant of the discontinued EIA–22M, *Monthly Biodiesel Production Survey*. Industry has repeatedly expressed interest in getting more data on feedstock consumption for all plants and separately for biodiesel and renewable diesel plants. The current disclosure rules do not allow for publishing that level of detail. The proposed revision would treat biofuel feedstock consumption the same as all other petroleum supply feedstock data, allowing for publication of aggregate data that may allow for estimation of information reported by a specific respondent when few respondents report, or the data is dominated by one or two large respondents.

3. EIA proposes discontinuation of Part 10 of the Form EIA–819. Respondents have not reported any data in part 10a since its inception. EIA eliminated the data collected in part 10b from petroleum balances published in the *Petroleum Supply Monthly* beginning in 2019. We continued to collect and publish Methyl Tertiary Butyl Ether (MTBE) and Ethyl Tertiary Butyl Ether (ETBE) production, but EIA has determined this data collection has limited use.

**Form EIA–810, Monthly Refinery Report (Change to Form and Instructions)**

- EIA proposes removing Part 6 Annual Storage Capacity Supplement of the Form EIA–810. EIA is proposing a new Form EIA–830, *Annual Storage Capacity Report*, to collect storage capacity on an as-needed basis. The annual supplement to a monthly form

was confusing for respondents, resulting in unnecessary burden on respondents filling out the supplement monthly instead of annually, and additional burden on staff to perform non-response follow-up for respondents forgetting to file the annual supplement. The information collected on Part 6 will be moved to the proposed Form EIA-830, *Annual Storage Capacity Report* (standby).

#### **Form EIA-813, Monthly Crude Oil Report (Change to Form and Instructions)**

- EIA proposes removing Parts 6, 7, and 8 Annual Supplement for Storage Capacity and Stocks in Tanks and Underground Caverns of the Form EIA-813. The annual supplement to a monthly form was confusing for respondents, resulting in unnecessary burden on respondents filling out the supplement monthly instead of annually, and additional burden on staff to perform non-response follow-up for respondents forgetting to file the annual supplement. The information collected on Parts 6, 7, and 8 will be moved to the proposed Form EIA-830, *Annual Storage Capacity Report* (standby).

#### **Form EIA-815, Monthly Bulk Terminal Report (Change to Form and Instructions)**

- EIA proposes removing Part 4 Annual Supplement for Storage Capacity of the Form EIA-815. The annual supplement to a monthly form was confusing for respondents, resulting in unnecessary burden on respondents filling out the supplement monthly instead of annually, and additional burden on staff to perform non-response follow-up for respondents forgetting to file the annual supplement. The information collected on Part 4 will be moved to the proposed Form EIA-830, *Annual Storage Capacity Report* (standby).

#### **Form EIA-830, Annual Storage Capacity Report (Standby) (Proposed New Form)**

- EIA proposes collecting the data previously collected on annual supplements to monthly Forms EIA-810, EIA-813, and EIA-815 on a new form, EIA-830, *Annual Storage Capacity Report* (standby). Creating a stand-alone annual form for storage capacity eliminates unnecessary burden on respondents and staff caused by respondents filling out the annual supplement each month with the rest of their monthly submission, and the increased data collection efforts needed to obtain annual data that respondents are not accustomed to reporting on their

monthly submissions. EIA proposes the new Form EIA-830 be designated as a standby form to be activated as needed in times of significant market change or emergency.

(5) *Annual Estimated Number of Respondents*: 6,523;

EIA-800 consists of 105 respondents  
EIA-802 consists of 50 respondents  
EIA-803 consists of 95 respondents  
EIA-804 consists of 105 respondents  
EIA-805 consists of 790 respondents  
EIA-806 consists of 180 respondents  
EIA-809 consists of 150 respondents  
EIA-810 consists of 133 respondents  
EIA-812 consists of 110 respondents  
EIA-813 consists of 240 respondents  
EIA-814 consists of 290 respondents  
EIA-815 consists of 1,475 respondents  
EIA-816 consists of 450 respondents  
EIA-817 consists of 40 respondents  
EIA-819 consists of 275 respondents  
EIA-820 consists of 133 respondents  
EIA-830 consists of 1,852 respondents  
Pretest methodology consists of 50 respondents

(6) *Annual Estimated Number of Total Responses*: 114,891;

(7) *Annual Estimated Number of Burden Hours*: 176,071;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: \$16,716,181 (176,071 estimated burden hours times \$94.94). EIA estimates that respondents will have no additional costs associated with the surveys other than the burden hours and the maintenance of the information during the normal course of business.

*Statutory Authority*: 15 U.S.C. 772(b), 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on April 1, 2026.

**Debra Coaxum,**

*Acting Director, Office of Statistical Methods and Research, U.S. Energy Information Administration.*

**BILLING CODE 6450-01-P**

## **DEPARTMENT OF ENERGY**

### **Federal Energy Regulatory Commission**

[Docket No. UL26-4-000]

#### **William Taylor; Notice of Pending Jurisdictional Inquiry, and Soliciting Comments, Protests, and Motions To Intervene**

On February 4, 2026, the Federal Energy Regulatory Commission (Commission) received a request from the Vermont Department of Environmental Conservation (Vermont DEC) for a jurisdictional determination

for the unlicensed Baldin Brook Hydroelectric Project. The project is located on Baldin Brook in Lamoille County, Vermont.

Pursuant to section 23(b)(1) of the Federal Power Act (FPA),<sup>1</sup> a non-federal hydroelectric project must be licensed if it: (a) is located on a navigable water of the United States; (b) occupies lands or reservations of the United States; (c) utilizes surplus water or waterpower from a government dam;<sup>2</sup> or (d) is located on a stream over which Congress has Commerce Clause jurisdiction, is constructed or modified on or after August 26, 1935, and affects the interests of interstate or foreign commerce.

Regarding condition (d) above, for purposes of FPA section 23(b)(1), headwaters and tributaries of navigable waters are Commerce Clause streams;<sup>3</sup> “post-1935” construction or modification at an existing project includes enlarging a project, such as increasing size of the reservoir, height of the dam, or generating capacity;<sup>4</sup> and projects that generate energy for transmission on the interstate grid affect interstate commerce.<sup>5</sup>

Vermont DEC requests that the Commission examine its jurisdiction for the Baldin Brook Hydroelectric Project on the grounds that the project is located on a stream over which Congress has Commerce Clause jurisdiction, was constructed after August 26, 1935, and is connected to the transmission grid.<sup>6</sup>

In response to Vermont DEC’s requests, Commission staff is investigating the jurisdictional status of the Baldin Brook Hydroelectric Project (UL26-4-000). A copy of Vermont DEC’s request may be viewed on the Commission’s website at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number, UL26-4-000.

<sup>1</sup> 16 U.S.C. 817(1).

<sup>2</sup> A project that meets condition (a), (b), or (c) is not required to be licensed if it holds a still valid pre-1920 federal permit.

<sup>3</sup> *FPC v. Union Electric Co.*, 381 U.S. 90, 94-96 (1965).

<sup>4</sup> *See, e.g., L.S. Starrett Co. v. FERC*, 650 F.3d 19, 26-27 (1st Cir. 2011); *Cent. Vt. Pub. Serv. Corp.*, 54 FERC ¶ 61,132, at 61,434 (1991) (citing *Puget Sound Power & Light Co. v. FPC*, 557 F.2d 1311 (9th Cir. 1977); *Aquenergy Systems, Inc.*, 29 FERC ¶ 61,026 (1984)).

<sup>5</sup> *See FPC v. Union Elec. Co.*, 381 U.S. at 94-95. Moreover, it is well settled that small hydroelectric projects that are connected to the interstate grid, even if they have no interstate sales, affect interstate commerce by displacing power from the grid, and the cumulative effect of the national class of these small projects is significant for purposes of FPA section 23(b)(1). *See Habersham Mills v. FERC*, 976 F.2d 1381, 1384-85 (11th Cir. 1992).

<sup>6</sup> Vermont DEC February 4, 2026 Request for Determination of Commission Jurisdiction for the Baldin Brook Hydroelectric Project at 2.
