[Project No. 803-129]

#### Pacific Gas and Electric Company; Notice of Intent To Prepare an Environmental Assessment

On February 6, 2026, Pacific Gas and Electric Company filed an application for a temporary variance from the minimum flow requirements for the DeSabra-Centerville Project No. 803. The project is located on Butte Creek, West Branch Feather River, and their tributaries in Butte County, California. The project occupies federal lands managed by the U.S. Forest Service and Bureau of Land Management.

The licensee requests that the instantaneous minimum flow requirement in the West Branch Feather River, below Hendrick Head Dam, of 15 cubic feet per second (cfs) in a normal water year and 7 cfs in a dry water year, be temporarily modified to 7 cfs over 48 hours regardless of water year type. In Philbrook Creek, below Philbrook Reservoir, it requests that the instantaneous minimum flow requirement of 2 cfs in both normal and dry water years be temporarily modified to between 1 and 2 cfs over 48 hours. The modifications would begin on May 4, 2026, and continue through September 30, 2026, however, in the event that water storage in Philbrook Reservoir has not exceeded 2,116 acre-feet by April 1, 2026, the licensee would commence modifications in Philbrook Creek sometime between April 1, 2026, and May 4, 2026, if supported by the California Department of Fish and Wildlife, National Marine Fisheries Service, and the U.S. Fish and Wildlife Service. The licensee states that the temporary variance would maximize the delivery of flows released from Philbrook to Butte Creek by eliminating the need to release additional buffer flows to ensure the requisite

instantaneous minimum instream flows are always met. The proposed variance would help preserve cold water storage in Philbrook Reservoir, increase flow to Butte Creek via the Hendricks Canal, and decrease water residence time in the DeSabra Forebay, thus providing additional water to Butte Creek during the hot summer months to minimize high temperature effects to Central Valley spring-run Chinook salmon, and to preserve water for release later in the summer months towards the end of their holding period when the situation is most critical. A Notice of Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Protest was issued on February 26, 2026.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) for the project.<sup>1</sup> Commission staff plans to issue an EA by May 29, 2026. Revisions to the schedule may be made as appropriate.

Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through August 31, 2026. This document allows 60 days for public comments.

**DATES:** Comments must be submitted on or before June 8, 2026.

**SUPPLEMENTARY INFORMATION:** This is a proposed extension of the ICR, which is currently approved through August 31, 2026. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

This document allows 60 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is (202) 566-1744. For additional information about EPA's

public docket, visit <https://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** document to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

**Abstract:** The authority for these requirements is sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986 (42 U.S.C. 11011, 11012). EPCRA section 311 requires owners and operators of facilities subject to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (HCS) to submit a list of chemicals or Safety Data Sheets (SDSs) (for those chemicals that exceed thresholds, specified in 40 CFR part 370) to the State Emergency Response Commission (SERC) or Tribal Emergency Response Commission (TERC), Local Emergency Planning Committee (LEPC) or Tribal Emergency Planning Committee (TEPC), and the local fire department (LFD) with jurisdiction over their facility. This is a one-time requirement unless a facility becomes subject to the regulations or has updated information on the hazardous chemicals that were already submitted by the facility. EPCRA section 312 requires owners and operators of facilities subject to the OSHA HCS to submit an inventory form (for those chemicals that exceed the thresholds, specified in 40 CFR part 370) to the SERC (or TERC), LEPC (or TEPC), and LFD with jurisdiction over their facility. This inventory form, the Tier II Emergency and Hazardous Chemical Inventory Form, is to be submitted on or before March 1 of each year and must include the inventory of hazardous

chemicals present at the facility in the previous calendar year. Currently, all states require facilities to submit the Federal Tier II form or the state-equivalent, including electronic submission.

The burden estimates, numbers and types of respondents, wage rates and unit and total costs for this ICR renewal will be revised and updated if needed during the 60-day comment period while the ICR Supporting Statement is undergoing review at OMB.

**Form numbers:** Tier I Emergency and Hazardous Chemical Inventory Form, EPA Form No. 8700-29, Tier II Emergency and Hazardous Chemical Inventory Form, EPA Form No. 8700-30.

**Respondents/affected entities:** Manufacturers and non-manufacturers required to have available a MSDS (or Safety Data Sheet (SDS)) under the OSHA HCS.

**Respondent's obligation to respond:** Mandatory (sections 311 and 312 of EPCRA).

**Estimated number of respondents:** 471,787 facilities (total). This figure includes 3,052 LEPCs and SERCs.

**Frequency of response:** Annual.

**Total estimated burden:** \$6,963,271 hours per year (includes LEPCs and SERCs). Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$306,735,727 per year, includes \$1,715,094 annualized capital or operation & maintenance costs.

**Changes in estimates:** The burden hours are likely to stay substantially the same. Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section when the updated ICR Supporting Statement is completed.
