Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** document to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The authority for these requirements is sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986 (42 U.S.C. 11011, 11012). EPCRA section 311 requires owners and operators of facilities subject to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (HCS) to submit a list of chemicals or Safety Data Sheets (SDSs) (for those chemicals that exceed thresholds, specified in 40 CFR part 370) to the State Emergency Response Commission (SERC) or Tribal Emergency Response Commission (TERC), Local Emergency Planning Committee (LEPC) or Tribal Emergency Planning Committee (TEPC), and the local fire department (LFD) with jurisdiction over their facility. This is a one-time requirement unless a facility becomes subject to the regulations or has updated information on the hazardous chemicals that were already submitted by the facility. EPCRA section 312 requires owners and operators of facilities subject to the OSHA HCS to submit an inventory form (for those chemicals that exceed the thresholds, specified in 40 CFR part 370) to the SERC (or TERC), LEPC (or TEPC), and LFD with jurisdiction over their facility. This inventory form, the Tier II Emergency and Hazardous Chemical Inventory Form, is to be submitted on or before March 1 of each year and must include the inventory of hazardous

chemicals present at the facility in the previous calendar year. Currently, all states require facilities to submit the Federal Tier II form or the state-equivalent, including electronic submission.

The burden estimates, numbers and types of respondents, wage rates and unit and total costs for this ICR renewal will be revised and updated if needed during the 60-day comment period while the ICR Supporting Statement is undergoing review at OMB.

Form numbers: Tier I Emergency and Hazardous Chemical Inventory Form, EPA Form No. 8700–29, Tier II Emergency and Hazardous Chemical Inventory Form, EPA Form No. 8700–30.

Respondents/affected entities: Manufacturers and non-manufacturers required to have available a MSDS (or Safety Data Sheet (SDS)) under the OSHA HCS.

Respondent’s obligation to respond: Mandatory (sections 311 and 312 of EPCRA).

Estimated number of respondents: 471,787 facilities (total). This figure includes 3,052 LEPCs and SERCs.

Frequency of response: Annual.

Total estimated burden: \$6,963,271 hours per year (includes LEPCs and SERCs). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$306,735,727 per year, includes \$1,715,094 annualized capital or operation & maintenance costs.

Changes in estimates: The burden hours are likely to stay substantially the same. Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section when the updated ICR Supporting Statement is completed.
