

*Number of Respondents and Responses:* 4,452 respondents; 450,838 responses.

*Estimated Time per Response:* 0.5–4.5 hours.

*Frequency of Response:* On occasion reporting requirements; recordkeeping and third-party disclosure requirements.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 222 and 251.

*Total Annual Burden:* 452,623 hours.

*Total Annual Cost:* No cost.

*Needs and Uses:* Section 251 of the Communications Act of 1934, as amended, 47 U.S.C. 251, is designed to accelerate private sector development and deployment of telecommunications technologies and services by spurring competition. Section 222(e) is also designed to spur competition by prescribing requirements for the sharing of subscriber list information. These information collection requirements are designed to help implement certain provisions of sections 222(e) and 251, and to eliminate operational barriers to competition in the telecommunications services market. Specifically, these information collection requirements will be used to implement (1) local exchange carriers' (LECs) obligations to provide their competitors with dialing parity and non-discriminatory access to certain services and functionalities; (2) incumbent local exchange carriers' (ILECs) duty to make network information disclosures; and (3) numbering administration. In November 2017, the Commission adopted new rules concerning certain information collection requirements implemented under section 251(c)(5) of the Act, pertaining to network change disclosures. Most of the changes to those rules applied specifically to a certain subset of network change disclosures, namely notices of planned copper retirements. In addition, the changes removed a rule that prohibits incumbent LECs from engaging in useful advanced coordination with entities affected by network changes. In June 2018, the Commission revised its network change disclosure rules to (1) revise the types of network changes that trigger an incumbent LEC's public notice obligation, and (2) extend the force majeure provisions applicable to copper retirements to all types of network changes. On March 26, 2026, the Commission adopted a Report and Order that modified certain recordkeeping or reporting requirements that relate to the obligations of ILECs planning to retire copper communications facilities or make other changes to their networks that might

impact interoperability. Specifically, the Commission: (1) eliminated all filing requirements in the Commission's network change disclosure rules and the Commission's process of issuing public notices for short-term network changes and copper retirements and the associated objection process for interconnected service providers, (2) required that the method of notice the incumbent LEC uses be publicly accessible, and (3) expanded the direct notice requirement for copper retirements and short-term network changes to include 911 service providers and directly interconnecting LECs that support essential functions within 911 networks, including providers delivering 911 traffic to selective routers for transmission to public safety answering points. The changes were aimed at removing unnecessary regulatory barriers to the deployment of high-speed broadband networks while providing reasonable public notice of planned network changes to impacted stakeholders and ensuring continued 911 connectivity.
