

Annual Burden Hours: 300.

Needs and Uses: The United States Marine Corps is collecting this information to identify and notify individuals who may have been exposed to contaminated drinking water at Marine Corps Base Camp Lejeune between 1953 and 1987. This collection is necessary to comply with Section 315 of the 2008 Defense Authorization Act (Pub. L. 110–181), which mandates that the Secretary of the Navy notify all persons, including residents and workers, who were potentially affected.

The information is used to build and maintain the Camp Lejeune Notification Database. The Marine Corps uses this database to send an official notification letter and provide registrants with current information and research updates. The collected information may also be used by federal health agencies, such as the Department of Veteran Affairs and the Agency for Toxic Substances and Diseases Registry, to assist with future health studies related to exposure.

The respondents are former residents and workers of Camp Lejeune during the specified timeframe who voluntarily register for the database via the official website, email, or toll-free number. Without this information collection, the Marine Corps would be unable to fulfill its legal obligation to directly contact and inform this population about their potential exposure and related health information.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

DoD Clearance Officer: Mr. Reginald Lucas.

Dated: May 8, 2026.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 7887–019]

Ashuelot River Hydro, Inc.; Notice of Intent To Prepare an Environmental Assessment

On June 28, 2024, Ashuelot River Hydro, Inc. filed an application to relicense the 1,000-kilowatt Minnewawa Hydroelectric Project No. 7887. The project is located on the Minnewawa Brook in the Town of Marlborough in Cheshire County, New Hampshire.

In accordance with the Commission’s regulations, on February 13, 2026, Commission staff issued a notice that the project was ready for environmental analysis (REA notice). Based on the information in the record, including comments filed on the REA notice, staff does not anticipate that licensing the project would constitute a major federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an environmental assessment (EA) on the application to relicense the project.¹

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission’s final licensing decision.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or OPP@ferc.gov.

The application will be processed according to the following schedule. The EA will be issued for a 30-day comment period. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA	February 26, 2027.

Any questions regarding this notice may be directed to Justin R. Robbins by telephone at (202) 502–8308 or by email at justin.robbs@ferc.gov.
