**SUPPLEMENTARY INFORMATION:****I. Abstract**

This is a request for extension of an approved information collection. NOAA's National Ocean Service's U.S. Integrated Ocean Observing System (IOOS) Office is requesting approval to continue a web-based survey of

employers who provide either services or infrastructure to IOOS or organizations that add value to the IOOS data and other outputs by tailoring them for specific end uses. The purpose of the survey and overall project is to gather information to articulate the collective and derived value of the IOOS enterprise and to create a profile of businesses and organizations who are involved with providing services or utilizing IOOS data for other specific end uses. This survey was conducted in FY2015, FY2020, and FY2025 and is intended to be repeated on a regular basis in order to track the growth of the U.S. Ocean Enterprise. The survey provides critical assessment data and is necessary in order to collect demographic, financial, and functional information for each organization with regards to their involvement with IOOS. Data from this web survey will be analyzed and used to produce a final report. The results will demonstrate the size and economic impact of IOOS data to the United States marine ocean sector.

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for extension of a currently approved information collection. Section 4(d) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et. seq.*) requires the National Marine Fisheries Service (NMFS) to adopt such regulations as it “deems necessary and advisable to provide for the conservation of” threatened species. Those regulations may include any or all the prohibitions provided in section 9(a)(1) of the ESA, which specifically prohibits “take” of any endangered species (“take” includes actions that harass, harm, pursue, kill, or capture). The first salmonid species listed by NMFS as threatened were protected by virtually blanket application of section 9 take prohibitions. There are now 23 separate Distinct Population Segments (DPS) of west coast salmonids listed as threatened, covering a large percentage of the land base in California, Oregon, Washington, and Idaho. NMFS is obligated to enact necessary and advisable protective regulations. NMFS makes section 9 prohibitions generally applicable to many of those threatened DPS, but also seeks to respond to requests from states and others to both provide more guidance on how to protect threatened salmonids and avoid take, and to limit the application of take prohibitions wherever warranted (see 70 FR 37160, June 28, 2005, 71 FR 834, January 5, 2006, and 73 FR 55451, September 25, 2008). The regulations describe programs or circumstances that contribute to the conservation of or are being conducted in a way that limits impacts on listed salmonids. Because

we have determined that such programs/circumstances adequately protect listed salmonids, the regulations do not apply the “take” prohibitions to them. Some of these limits on the take prohibitions entail voluntary submission of a plan to NMFS and/or annual or occasional reports by entities wishing to take advantage of these limits or continue within them.

The currently approved application and reporting requirements apply to Pacific marine and anadromous fish species.
