

CPS to be applied to site preparation for establishing perennial vegetation more generally. The “Definition”, “Purpose”, and “Conditions Where Practice Applies” sections were refined for improved clarity. Criteria were reorganized by subject, and several additional criteria were removed to streamline the CPS. Some considerations were revised and incorporated into the “Criteria” section where appropriate. Portions of the “Operations and Maintenance” section addressing chemical exposure were removed, as these requirements are already addressed in the “General Criteria” section. The References were updated with new supporting references, and an outdated reference was removed.

Waste Separation Facility (Code 632): A purpose related to manure handling was removed because it was not associated with a resource concern; the concept is now addressed under the “Conditions Where Practice Applies” section. The safety section was updated to include references to industry standards. The CPS also addresses a settling basin seepage issue, adds new criteria related to membrane filters, and includes minor edits throughout to clarify, ensure plain language, and align with current formatting requirements.

Waste Treatment (Code 629): Revisions to the CPS were minor and include adding a new safety requirement for storing chemical or biological agents. The CPS also includes minor updates throughout to improve clarity and to align with current formatting requirements, NRCS general writing guidelines, and plain language guidelines.

Wastewater Treatment, Milk House (Code 627): The Revisions to the CPS are minor and include adding flexibility for vegetative treatment in areas without a year-round growing season. Other changes include updated formatting and alignment with plain language guidelines.

Water Well (642): The most significant change to this CPS is moving aquifer testing from the “Criteria” section to the “Considerations” section to allow states more latitude in how they determine the maximum drawdown and pumping rate that a well and aquifer can provide. Requirements for an onsite investigation by a geologist have been changed to allow for a reconnaissance-level investigation, with or without geophysics, better reflecting current agency practices. The previous requirement to install ten feet of casing when drilling into hard rock formations was eliminated to accommodate varying state regulations. Guidance for well

development was expanded to provide more descriptive instruction. References throughout the CPS were updated, and requirements to follow external standards were removed; instead, the critical elements of those standards are incorporated directly into the CPS.

Waterspreading (Code 640): Language throughout the CPS was revised for improved clarity. The water impounding dike criteria previously included in the “Additional Criteria for Detention-Type Waterspreading Systems” section were removed; instead, the CPS now references the design criteria contained in NRCS CPS Dike and Levee (Code 356), for consistency. Wetland-related considerations were added to the “Considerations” section to ensure that potential impacts to wetlands are minimized, mitigated, or avoided whenever possible.

Well Decommissioning (Code 351): Several notable updates were made throughout the CPS. The definition was expanded to include devices similar to wells and piezometers. Revisions to the “Purpose” section directly align with NRCS resource concerns. An important enhancement allows for application of the CPS in situations where soil or groundwater is known or suspected to be contaminated. Requirements to follow American Standard for Testing and Material (ASTM) D5299 were streamlined; instead of referencing the full ASTM standard, important points were summarized into minimum requirements. Additional instructions were added for situations that require special procedures, including those involving artesian pressure, fractured rock, mine shafts, or caverns. Disinfection guidance was moved to the “Considerations” section, and a new consideration was added to address groundwater quality when selecting sealing materials.

Scott Edwards,
Associate Chief, Natural Resources
Conservation Service.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Housing Vacancy Survey (HVS)

The Department of Commerce will submit the following information

collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. This notice allows for 30 days for public comments.

Agency: U.S. Census Bureau, Commerce.

Title: Housing Vacancy Survey.

OMB Control Number: 0607–0179.

Form Number(s): None.

Type of Request: Regular submission. Request for an Extension without Change of a Currently Approved Collection.

Number of Respondents: 59,000.

Average Hours per Response: 0.05.

Burden Hours: 2,950.

Needs and Uses: Collection of the HVS in conjunction with the Current Population Survey began in 1956 and serves a broad array of data users. The HVS provides the only quarterly statistics on rental vacancy rates and homeownership rates for the United States, the four census regions, the 50 states and the District of Columbia, and the 75 largest metropolitan statistical areas (MSAs). Private and public sector organizations use these rates extensively to gauge and analyze the housing market with regard to supply, cost, and affordability at various points in time.

Policy analysts, program managers, budget analysts, and congressional staff use these data to advise the executive and legislative branches of government with respect to the number and characteristics of units available for occupancy and the suitability of housing initiatives. These data are a component of consumer expenditure statistics. They also are used to project mortgage demand and to measure the adequacy of the supply of rental and homeowner units. In addition, investment firms use the HVS data to analyze market trends and for economic forecasting.

Affected Public: Individuals who have knowledge of the vacant sample unit (landlords, rental agents, neighbors).

Frequency: Monthly.

Respondent’s Obligation: Voluntary.

Legal Authority: Title 13, United States Code, Section 182; and Title 29, United States Code, Section 2.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the

Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently Under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0607–0179.

Sheleen Dumas,

Departmental PRA Compliance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Current Population Survey (CPS) 2026 Field Test

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. Public comments were previously requested via the **Federal Register** on March 5, 2026, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Commerce.

Title: Current Population Survey 2026 Field Test.

OMB Control Number: 0607–1032.

Form Number(s): There are no forms. All interviews are conducted using computers.

Type of Request: Regular submission. Reinstatement with change of a previously approved collection.

Number of Respondents: 18,000.

Average Hours Per Response: 10 minutes.

Burden Hours: 8,000.

Needs and Uses: The 2026 Field Test’s goal is to test the use of an

internet self-response method to measure its success as a possible method of contact and interviewing with the goal of review accuracy, reporting, and representativeness. In addition, the goal is to experiment with timing and contacts in order to refine procedures that best fit the needs of CPS.

Affected Public: Households.

Frequency: Monthly.

Respondent’s Obligation: Voluntary.

Legal Authority: Title 13, U.S.C. 8(b), 141, and 182.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–57–2026]

Foreign-Trade Zone (FTZ) 153, Notification of Proposed Production Activity; Foxx Development, Inc.; (Smartphones); San Diego, California

Foxx Development, Inc. submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in San Diego, California within Subzone 153O. The notification conforming to the requirements of the Board’s regulations (15 CFR 400.22) was received on May 27, 2026.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/ component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the

background section of the Board’s website—accessible via www.trade.gov/ftz.

The proposed finished product is smartphones for cellular networks (duty free).

The proposed foreign-status materials/components include smartphone system-on-chips; baseband processors; application processors; lower-power double data rate 5 dynamic random-access memo; embedded multimedia card 5.1 NAND flash, camera modules for mobile phones; smartphone battery pack; smartphone display module; liquid crystal display screen assembly; organic light-emitting diode screen assembly (duty free).

The request indicates that certain materials/components are subject to duties under section 122 of the Trade Act of 1974 (Section 122), section 232 of the Trade Expansion Act of 1962 (section 232), or section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable section 122, section 232, and section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board’s Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is July 15, 2026.

A copy of the notification will be available for public inspection in the “Online FTZ Information System” section of the Board’s website.

For further information, contact Brian Warnes at brian.warnes@trade.gov.

Dated: June 2, 2026.

Elizabeth Whiteman,

Executive Secretary.
