**SUPPLEMENTARY INFORMATION:** On May  
18, 2026, the Senior Official Carrying  
out the Delegable Duties of the Director  
of the Centers for Disease Control and  
Prevention issued an Order prohibiting  
the introduction of certain persons who  
have departed from, or were otherwise  
present within, specified countries  
during the last 21 days. On May 22,  
2026, the Assistant Secretary for Health,  
HHS, issued an Amended Order that  
reflected updates to 42 CFR 71.40(f),  
which no longer provided an exemption  
for lawful permanent residents from  
such orders. CDC accepted comments  
on both the original Order and  
Amended Order through June 22, 2026.  
During this time CDC received three  
comments, which are addressed below.  
With this Order, CDC continues the  
suspension of the right to introduce  
certain persons who have departed  
from, or were otherwise present within,  
specified countries during the last 21  
days. This Order is effective for a period  
of 30 days.

#### Response to Comments on Previous Orders

*Comments:* One commenter expressed  
concern that the Order could  
discriminate against minorities and  
urged CDC not to proceed with the  
Order. A second commenter questioned  
the respective roles of CDC and the  
Department of Homeland Security  
(DHS) in implementing and enforcing  
the Order and expressed concern  
regarding DHS's role in carrying out  
activities associated with the Order.

*Response:* CDC appreciates these  
comments. The Order and Amended  
Order are based on public health  
considerations with the intended  
purpose of averting the serious danger  
of the introduction of a quarantinable  
communicable disease into the United  
States. CDC notes that the Public Health  
Service Act authorizes the Secretary to  
make and enforce regulations to prevent  
the introduction, transmission, or  
spread of communicable diseases (42  
U.S.C. 264), and authorizes customs  
officers and Coast Guard officers to aid  
in the enforcement of quarantine rules  
and regulations (42 U.S.C. 268(b)).

CDC's regulations further provide that  
authorized officers, including customs  
officers, may assist in the enforcement  
of public health measures under 42 CFR  
71.40(d)(2). Accordingly, CDC may  
coordinate with DHS and other federal  
agencies, as appropriate, to support  
implementation of the public health  
orders.

*Comment:* Airlines for America  
(A4A), a trade association for U.S.  
passenger and cargo air carriers, also  
submitted a comment on behalf of its  
members. A4A generally supports CDC's  
efforts to prevent the introduction of  
Ebola disease into the United States but  
urges CDC to adopt a more risk-  
informed and operationally flexible  
approach. A4A requests: (1) greater  
consultation with industry prior to  
implementation of restrictions; (2)  
narrowing the geographic scope of the  
Order to specific affected provinces  
rather than entire countries; (3)  
excepting certain passengers who transit  
through affected areas but do not  
deplane; (4) adding foreign flight crews  
operating turnaround flights to the list  
of exempted persons; (5) expanding the  
list of designated arrival airports; and  
(6) providing additional guidance  
regarding aircraft diversions and  
operational contingencies.

*Response:* CDC appreciates A4A's  
continued engagement and recognizes  
the important role that air carriers play  
in supporting public health measures  
designed to reduce the risk of  
introduction and spread of  
communicable diseases. CDC, HHS,  
DHS, and other Federal partners will  
continue to consider operational  
impacts when implementing public  
health measures.

CDC does not agree that the Order  
should be limited only to specific  
provinces or regions within affected  
countries at this time. Available  
epidemiologic information indicates  
ongoing transmission and the potential  
for rapid changes in this outbreak.  
Additionally, although South Sudan has  
not yet reported any cases, it is  
considered at high risk because of its  
close border with affected areas in the  
Democratic Republic of the Congo (DRC)  
and Uganda, limited healthcare  
infrastructure, and cross-border  
population movement. In addition,  
reliable verification of a traveler's  
precise location within an affected  
country during the relevant exposure  
period may not always be feasible in the  
operational context of international  
travel. For these reasons, CDC has  
determined that applying the Order to  
persons who have been present within  
these three countries during the  
preceding 21 days remains the most
