- *FERC-919 (OMB 1902-0234):* Market-Based Rates for Wholesale Sales of

Electric Energy, Capacity, and Ancillary Services by Public Utilities

Abstract: The Commission is obligated under Section 205 and Section 206 of the Federal Power Act (FPA) to regulate electric rates and tariffs. The FERC-516 information collection is associated with filings that are submitted to the Commission to regulate electric rates and tariffs, which provide the Commission and the public with information regarding utility rates and service conditions. Without tariffs, FERC and the public would not be able to properly evaluate rates. This collection currently consists of 15 information collection activities that support regulating the electric rates and tariffs.

The Commission conducted an in-depth review of information collections related to electric tariffs and identified several collections that were unnecessarily separated into distinct collections, as well as information collection instruments that were completed or no longer needed. The Commission proposes to consolidate these information collection activities under FERC-516, its primary electric tariff information collection, so that we can accurately reflect the burden placed on the public. In addition, the Commission is merging the burden of the temporary collections FERC-516E (Electric Rate Schedules and Tariff Filings—NAESB Standards—Electric) and FERC-516J (Project Area Labor Wage Data) into FERC-516. FERC is also renewing all of the relevant information collections to harmonize their expiration dates under FERC-516. Once the information collection activities are incorporated into FERC-516, then the Commission will discontinue the other collections as they will no longer be needed.

1. *FERC-516 (OMB 1902-0096 Exp 11/30/2026):* Electric Rates and Tariffs Section 206 of the FPA, 16 U.S.C. 824e, obligates the Commission to remedy unjust, unreasonable, and unduly discriminatory or preferential rates, terms, and conditions of transmission service. The Commission uses information provided through the FERC-516 collection to analyze proposed changes to tariffs, rates, fares, and charges of public utilities providing electric interstate transmission and other jurisdictional services.

2. *FERC-516A (OMB 1902-0203 Exp 11/30/2026):* Standardization of Small Generator Interconnection Agreements and Procedures [SGIA and SGIP].

The regulations at 18 Code of Federal Regulations (CFR) 35.28(f)(1) require transmission providers to include the
